

WINDSURFING 2018

ADDICTED TO

RIDE

FANATIC

OUR WAY OF LIFE IS FUELLED BY OUR ADDICTION TO RIDE. WE VALUE EACH SESSION, ADVENTURE AND DISCOVERY. BUT MORE THAN ANYTHING IT'S ALL ABOUT GIVING BACK TO YOU, OUR CUSTOMER THROUGH OUR PRODUCTS THAT WE DEVELOP AND CREATE EACH YEAR. OUR TEAM IS INVALUABLE AND EVERY YEAR WE ARE GREETED BY TECHNICAL KNOW-HOW AND FRESH PERSPECTIVES. OUR COMBINED EXPERIENCE FACILITATES THE BRAND AND ITS PRODUCTS TO EVOLVE WITHIN THE RANGE, OR CREATE NEW CONCEPTS MAKING SURE FANATIC KEEPS LEADING THE WAY IN OUR SPORT.

WE ARE FANATIC

Founded in 1981, our brand represents over three decades of history. Trailblazing through our innovation, design and CAD platform we're proud of the reputation we've achieved as one of the world's leading watersports brands. From our champion team riders and ambassadors, to our R&D and in-house design team, we're able to ensure only the best from Fanatic.

WHAT WE STAND FOR

We have an ecological responsibility and are dedicated to cleaner, greener ways of making new boards with our Ocean Minded spirit.

Our R&D is a continuous process. By testing in different locations around the world throughout the year, we are able to deliver boards that will feel right at home wherever you take them. Our dedication gives us the confidence to say that Fanatic boards are the most advanced on the market.

FOR 2018 ...

This year we've worked hard across each demographic of our brand, and we're stoked with the results!

Taking the lead from our Ocean Minded spirit, we've created the greener, more eco-friendly Gecko Eco. Although our whole brand is working in the same direction, this model's gaining the right response to lead our industry down an exciting path.

We explored the world of Foiling and created the Gecko Foil Edition; an unhindered Freeride/Foil machine packed with versatility. This all-inclusive model is designed to effortlessly adapt from one to another, changing your sessions forever.

We welcome the Grip! The all-in-one wave weapon of champions. Fast, snappy and adaptable to the conditions, this fully customizable design will satiate the appetite of even the most die-hard waveriders around.

WAVE

Whether you're shredding overhead point breaks or slashing onshore beach breaks, we've got it covered.

New for 2018 is the Grip! The wave-weapon of champions, its wide swallow tail and fast rocker line pumps out loads of spray through the turns. Our wave team has been testing this concept for over 24 months and have specified the best possible fin setup per board, the name Grip is a result of that R&D process, defining exactly how much grip and drive each shape needs.

The Stubby TE welcomes the new 82 and 89 sizes to the fine-tuned 76 and 99. The parallel concept and wide diamond tail provides supercharged planing, whilst the rail shape and compact outline make tight turns easier than ever. Available in TE this radical yet straightforward model is a must-have for every quiver.

GRIP TE, STUBBY TE

WAVE / FREESTYLE

Leaving a legacy in its wake, we wave goodbye to the FreeWave as we know it and welcome a new era! The FreeWave STB is available in 4 sizes, 85, 95, 105 and the new 115, as well as three exciting constructions. Straighter, more parallel rails are combined with a Stubby-Style nose for easy wave performance and epic bump & jump!

FREEWAVE STB TEXTREME, FREEWAVE STB TE, FREEWAVE STB

ALICE ARUTKIN

FREESTYLE

Popping onto podiums worldwide to claim their 7th PWA Freestyle title is dream-team Gollito Estredo and the Skate TE. Coming in 4 sizes (86 to 108), the 93 is more compact and with less nose area for even faster rotations, and reduced swing weight. An integrated arch support in the tail pad adds comfort underfoot, whilst our light yet highly durable BXIC construction ensures a ride that can endure your advancements. Feeding the hunger of progressive Freestyle fanatics across the globe with its mind-blowing acceleration, top speeds and power, this design slips seamlessly between aerial and sliding tricks. Full of spirit, engaging and raring to go, the Skate is happiest under the feet of ambitious riders. He who dares wins!

SKATE TE

FREERIDE

Take a journey across the ocean with one of our fun-filled Freerideboards. You're in for a Blast with the master of Freeride. The slim center combined with a wide diamond tail and compact nose means this range does exactly what is says on the tin.

For 2018 the Blast 100, 115 and 130 line-up has been extended with a floaty 145. No wind, no worries, this is your ticket to ride. The ever-popular Gecko range consists of seven fun and friendly boards ranging from 98 – 156, and available in two constructions (BXF and HRS).

Drawing on our Ocean Minded spirit for inspiration, we created the eco-friendly Gecko Eco. Embracing all the outstanding riding characteristics of the Gecko, we use Flax, Cork and Bamboo to form an exciting layup with a fine finish.

Morphing from Freeride to Foil has never been easier with the new Gecko Foil. The ideal entry setup into the world of Foiling, the full nose outline creates the perfect landing gear when coming down off the Foil. The Deep Tuttle Box accommodates both a Freeride fin and Foil, whilst the wide compact outline of both the 120 and 133 deliver early planing, control and ease of manoeuvres. A magic carpet has never felt so good!

SLALOM / RACE

Look alive racing demons! This is the fastest range of Raceboards on the planet and it's yours for the taking. Oozing acceleration, speed and rapid change of direction, the slick sensation underfoot will leave you wanting more.

The Falcon Slalom TE's scream ›Speed!‹ with their super efficient cut out design and proven rockers for early planing and fast acceleration. Joining the six piece line is the all new 98, all of which showcase an ergonomic rail design for grip and power from start to finish. Optimised volume flow, premium Biax Carbon sandwich construction and on-trend graphics create a superior race experience.

Specialised and living for the lighter days is the Falcon Lightwind 159. 90 cm of wide surface area provides phenomenal early planing, whilst the super efficient cut out design delivers incredible speeds in marginal conditions. Special light wind interests are combined with finely tuned fin and mast position to further enhance planing and acceleration.

ENTRY

We value our ability to enable new sailors and the next generation to get hooked on our sport. With 30 years of riding experience and our passion for windsurfing, we combine our extensive and technical know-how to create the perfect Entry level and Kids boards.

Introducing the Viper and Ripper, both designed to deliver the same smooth entry into the sport to all age groups. Both models have a highly durable Softdeck (HRS), multiple footstrap options, and for the Viper range a daggerboard system, whilst the Ripper features a removable fin. The wide compact outline and scoop rocker line accommodate progression, controlled straightforward planing and easy manoeuvres. There's no task too big for these teaching machines and we guarantee a quick learning curve for all.

Without a doubt the Viper Air is the most desirable inflatable WindSUP ever. It's the ideal water sports toy and pure fun for the whole family, schools and clubs, available in two technologies (DL HD and Pure). The Ripper Air Windsurf is our inflatable WindSUP for the next generation and pure joy for kids and parents alike.

NEW FOR 2018

GECKO FOIL EDITION (120 / 133)

Switching effortlessly between a Freerider and a Foil board, the Gecko Foil Edition offers an easy and stable platform for your progression, whatever setup you choose to ride.

- › Foiling and Windsurfing
- › Perfect entry into both worlds
- › Passive planing
- › Super easy gybing
- › Comfortable and forgiving

GRIP TE (68 / 76 / 82 / 89 / 99)

A flawless blend of our bestselling Quad and TriWave, available in our exclusive Biax Innegra Carbon Light Finish Technology with adaptable multi-fin options to suit your personal style.

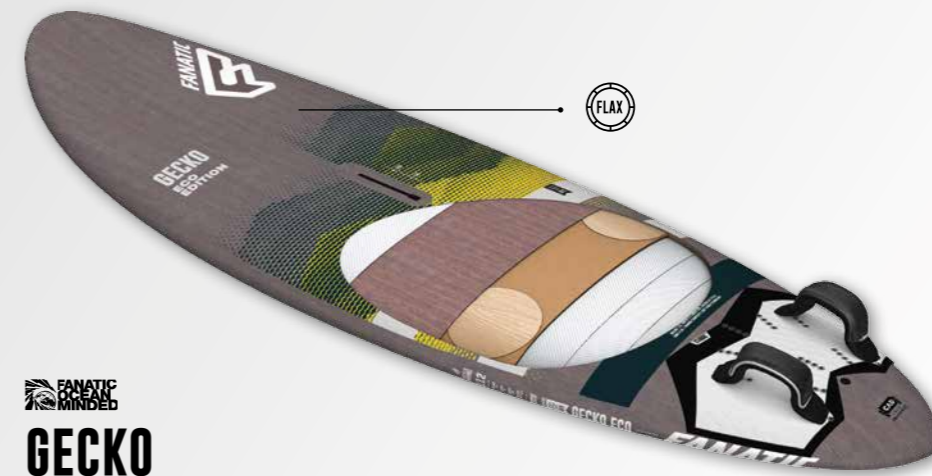

- › Early planing and fast
- › Adaptable to conditions
- › Snappy and carving surf style
- › Progressive wavesailing

FOIL FLOW H9

Our user-friendly and extremely durable entry level Flow H9 Foil brings new and exciting sensations to the amazing sport of windsurfing.

- › Incredibly user-friendly
- › Easy and stable ride
- › Super strong Carbon compound wings and fuselage
- › High specification Aluminium mast
- › Great value for money

GECKO ECO EDITION (112)

Built with Flax, Cork, Bamboo and Bio Resin, instead of a classic Glass and PVC sandwich, the Gecko Eco embodies our Ocean Minded spirit like no other board – and has its very own look and feel.

- › Fanatic Ocean Minded eco friendly layup
- › Wide and thin Freeride concept
- › Super stable
- › Passive planing
- › Super easy gybing
- › Comfortable and forgiving

NEW FOOTSTRAPS (PREMIUM AND STANDARD)

A new slick optic, even more comfort and including a marked scale to find your personal size settings in an instant, anti-twist plugs for a locked position plus the option to reverse for a tighter fit.

OTHER NEW SHAPES

Stubby TE 82 & 89: New shapes in the Stubby line-up

FreeWave STB 115: New bigger version for the stronger rider and light wind days (TE and TXTR only)

Blast 145: For an exciting ride when others just float

Falcon TE 98: Highly tuned new Slalom weapon following the lead of the successful Falcon 89

Falcon Speed 52.5: Our new medium size rocket, designed to smash your GPS record (more info: www.fanatic.com)

Viper Air WS/Viper Air WS Pure: New range of inflatable WindSUPs

Ripper Air Pure WS: The new feather light WindSUP for kids

MEET THE TEAM

CRAIG GERTENBACH

»WINDSURFING CELEBRATED ITS 50TH BIRTHDAY THIS YEAR, WE AT FANATIC ARE PROUD TO HAVE BEEN A PART OF IT FOR THE LAST 36 YEARS. THESE ARE EXCITING TIMES IN WINDSURFING, WITH THE NEW FOIL DISCIPLINE SET TO REVOLUTIONISE LIGHT WIND SAILING. AT THE SAME TIME, THE CONSTANT R&D BY OUR TEAM HAS LED TO SOME VERY EXCITING NEW SHAPES, FOR EXAMPLE COMBINING OUR QUAD AND TRIWAVE MODELS INTO ONE SHAPE, THE NEW ALL PURPOSE GRIP, ADAPTED TO EVERY STYLE/ CONDITIONS IMAGINABLE. IN TERMS OF CONSTRUCTIONS AND SUSTAINABILITY WE HAVE BEEN WORKING HARD ON SOLUTIONS TOWARDS THE GREENEST POSSIBLE PRODUCTS, STEP BY STEP WE ARE GETTING CLOSER, THE NEW GECKO ECO IS A GREAT PROJECT USING RENEWABLE MATERIALS LIKE FLAX, CORK AND BAMBOO TO REDUCE OUR FOOTPRINT ON THE ENVIRONMENT. YOUTH WINDSURFING COMPETITIONS NOW BOAST SOME OF THE HIGHEST PARTICIPATION IN SAILING, WINDSURFING CENTRES CONTINUE TO REPORT RECORD ATTENDANCE – OUR SPORT IS ENJOYING A NEW BOOST OF ENERGY AND WE ARE MORE THAN READY TO TAKE YOU TO THE NEXT LEVEL ON OUR NEW RANGE OF PRODUCTS!«

BRAND MANAGER – CRAIG GERTENBACH

As Brand and Sales Manager for Fanatic, Craig divides his time between testing, sales, team management and boardbag packer at photoshoots. South African born and bred he took up windsurfing back in 1982, joining Fanatic as a rider and PWA World Tour competitor in 1995.

HEAD OF MARKETING – KARIN GERTENBACH

Karin is the Head of Marketing for Fanatic. Having joined the brand back in 1999, she has evolved and worked hard to grow its image as much as she can. Married to Brand Manager Craig, and with two kids who love to Windsurf too, she lives the job 24/7 and is truly »Addicted to Ride!«

SHAPER – SEBASTIAN WENZEL

Sebastian Wenzel started windsurfing back in 1981, a time when he also began to create boards of his own. From 1985 – 2000, Sebastian competed in all disciplines, filling the role of designer and shaper for Fanatic back in 1994, he introduced the premium CAD design process into windsurfing in 2004. His creative eye and passion for the sport makes him a fundamental part of the progression and evolution of our lines, and the sport in general.

HEAD OF WAVE R&D & MARKETING MANAGER – KLAAS VOGET

Top 10 PWA competitor Klaas Voget, spends as much time as possible on the water developing the range, as well as taking care of Marketing collateral. Having signed his first rider contract with Fanatic back in 1999, he entered the PWA Tour in 2000, and got involved in the R&D in 2005 and Marketing in 2015.

PRODUCT MANAGER – DANIEL AEBERLI

Having first stepped on a windsurfing board at 7 years old, Daniel discovered his passion for Slalom and Racing at the young age of 15 years when he hit the competitive circuit. Securing Slalom Swiss Champion and multiple Freestyle titles, he pursued his love for the sport by getting involved in R&D and technical development over 12 years ago.

INTERNATIONAL TEAM

CAD SHAPING

With over a decade's worth of shaping experience under his belt and lifetime of passion for the sport, Sebastian Wenzel is a phenomenally accomplished designer. Utilising our CAD platform, he has created an accessible database dating back to 2004 and absolute precision when creating a new design. His ability to understand both sides of the coin as well as processing this information into development of our products, make him a key player within the Fanatic team.

OCEAN MINDED

OCEAN MINDED

Our Ocean Minded spirit is the driving force behind our passion to create and innovate. Complemented by our ethos of 'protecting what you love', we celebrate the challenges we face each day to come up with new ways to combine both. Acknowledging the part we play in creating a cleaner, greener environment we work hard to source ethical and raw materials to utilise in the production, packaging and distribution of our products. This year, we are proud to announce the launch of the Gecko Eco. Achieving a premium product with a unique layup of Flax, Cork and Bamboo, we're one step closer to accomplishing an eco-friendly future.

KEEP IT GREEN

Green is the prime color of the world and we intend to do everything we can to keep it that way. As we evolve our brand and create new products, our primary goal is to reduce the ecological impact on the environment by using ethically sourced materials. Each year significant gains are made, from using Ozone-Free foam cores and coloured resins vs spray paints, through to smart packaging and audited facilities. We embrace the challenges ahead and our Gecko Eco is a huge step in the right direction.

OZONE-FREE FOAM BLANKS

PACKAGE SMART

AUDITED FACILITIES FOR HEALTHIER WORKERS

SUSTAINABLE PERFORMANCE

SICOMIN'S GREENPOXY® BIO RESIN

Sicomin's Bio Resin contains a higher degree of plant based elements than traditional resin. Bio Resin is used in all models throughout the Fanatic range

FLAX FIBRE

Natural Flax fibre composite offers a very good strength / weight / flex ratio and replaces the classic oil based Glass / Carbon composite layup

BAMBOO

Bamboo is used over the entire bottom for superior optics and a unique flex response

CORK

Cork Sandwich is not only a natural source, it also brings superior shock absorption properties and replaces the oil based PVC Sandwich

GECKO ECO EDITION

INTERVIEW WITH FANATIC PRODUCT MANAGER DANIEL AEBERLI

As a brand, our passion for innovation, design and quality means that we are on a constant search to enhance upon what we've already created. We believe that we have a responsibility to Mother Nature and the incredible environment she provides us with because without it, windsurfing wouldn't be as we know it today.

Daniel, the new Gecko Eco is a great looking board! Is that actually a commercial product or more of a marketing gag?

The Gecko Eco is just one small step at the forefront of many, many steps happening behind the scenes at Fanatic for many years. We haven't just recently started a sustainability program for marketing reasons in times of global warming. Every person at Fanatic spends his life in the ocean and nature as much as possible and it's part of our mindset to protect our beautiful planet! Our Ocean-Minded Logo on every Fanatic board has already been transferring this mindset for quite a few years. At Boards & More we have task forces for more sustainable packaging, for eco friendly production processes and materials, for optimized shipping in both – sourcing and the final product, etc. etc. There is even an employee bonus program for riding a bike to work instead of using a car. Communication about all of these things is kept low, as we think this shouldn't be worth a mention, for us it's a matter of course in order to reduce the footprint we're leaving while bringing the highest quality product to our customer. The product materials are just a small and single part of the whole chain we're looking at – but the Gecko Eco is that product showing this aspect the most. To get back to your question – yes it's a great product delivering great fun, we already had some good orders before it was even released onto the market!

Interesting that you bring up looking at the whole picture. Shipping is a major factor in terms of pollution. Wouldn't it make sense to produce closer to your customer base – most Windsurf boards are sold in Europe ... ?

It's correct that shipping is one of the fields we're looking at optimizing. As we're a group of leading watersports brands within Boards & More, we're able to achieve great steps reducing shipping pollution with combined shipments from Asia to Europe and from the suppliers to our production facilities using similar materials throughout our group. In most markets, Boards & More uses a central warehouse system, meaning direct shipments to customers and shops, again improving efficiency and lowering CO² levels. This central warehouse also reduces overstock/closeouts by making planning more efficient, further eliminating wastage and extra transport costs.

Right now there is no option for us coming close to our high-end production facilities in Asia for the final production. All our prototyping is happening in Europe with very limited shipping to our R&D teams. Sustainability also means that quality wise and economically the setup has to work out to sustain jobs at one end and keep our costumers happy at the other end. As we're a premium brand delivering the best products, we produce at the world's best facilities with best standards in terms of production techniques, but also in terms of being at the forefront of recycling cut-offs, waste management, the use of non-toxic materials etc. Last but not least delivering a quality product is key to being sustainable.

Can you explain that? How exactly does quality reduce the CO² balance of a product?

If you have to replace products for quality reasons or your products simply have a short life-span, then that's not very sustainable even if you include some 10% sustainable materials to make a good impression at first glance. Our warranty rates are minimal, as we're focusing on every detail – not just including natural

materials or some with a better CO² balance. We only implement materials and concepts into production after looking at the entire process and after testing them 100% to maintain being at the forefront of both – delivering eco-friendly products and making sure these products actually work and don't have to be replaced and ultimately create more waste and pollution.

Why did you choose the Gecko for being the ECO-Flagship of the Fanatic-Range? How is it built?

It had to be a model that was diverse, versatile, user-friendly and suited to a wide range of skills without being focused too much on high-end performance like our wave or slalom models. The obvious choice was the top-selling Gecko. Its wide and thin Freeride concept makes it super stable, comfortable, easy to gybe and above all a whole lot of fun. The internal component of the Gecko Eco is still made of closed cell Ozone free EPS Blanks. We then add a layer of cork instead of PVC onto the deck. Whilst researching alternatives to carbon fibre for use in our bamboo and composite constructions, we came across Flax, a product that was not only environmentally friendly but had all performance and processing properties we were looking for. The Flax fibres are woven together to create a mesh material which is then laid over the cork – a fine finish that can be seen on the deck of the board. The last piece of the puzzle is to use Sicomin's GreenPox[®] Bio Resin to coat and laminate, a product we're using throughout the entire Fanatic range. Bio Resin has great amounts of sustainable and renewable components of vegetable oils as well as having a clean and efficient production process without hazardous emissions. Finally to give the Gecko Eco a great looking base, we've used renewable Bamboo with a natural matt finish, instead of the PVC. By using optimised colour components and resin systems based on their solvent concentration we've managed to produce striking graphics that have minimized environmental consequences.

TECHNOLOGY 2018

BIAX INNEGRA CARBON

45/45 degree Biax Innegra Carbon fibre, with an additional 90 degree fibre weave layer on top. This combination of precisely placed fibres caters for a perfect balance of flex and stiffness.

Extra wide Carbon and Innegra fibres with a linear alignment for best strength and efficiency of each individual fibre.

BXIC: BIAX INNEGRA CARBON LIGHT FINISH TECHNOLOGY

GRIP TE, STUBBY TE, FREEWAVE STB TE, SKATE TE

- 1 Light finish and weight saving graphics
- 2 90° fibre layer
- 3 45° Biax Innegra Carbon layer
- 4 Extra strong heel wood patch
- 5 Biax Innegra Carbon heel force patch
- 6 High density PVC sandwich core
- 7 Biax Innegra Carbon reinforcement
- 8 90° Glass reinforcement
- 9 Ultra light fibre layer
- 10 Super light EPS core

Our unique Biax Innegra Carbon Light Finish technology has proven to be the ultimate construction for our Wave and Freestyleboards. Last season, Fanatic took the initiative to take the next technical step by introducing this new and exclusive high-end fibre finish into all TE models, meeting the high demands of our World Cup Team.

PERFORMANCE FEATURES

- › Absorbs force from impact extremely well due to 45/45 degree weave, and achieves maximum strength via an extra layer of fibres on top with a 90 degree weave
- › Added durability and 3% stronger due to the woven fibre of the Carbon and Innegra
- › Perfectly balanced (50/50). Strong, forgiving and impact resistant Innegra combined with a durable Carbon weave

BXF: BIAX FIBRE / FULL PVC SANDWICH LIGHT FINISH TECHNOLOGY

FREEWAVE STB, BLAST LTD, GECKO LTD, GECKO FOIL, FALCON LIGHTWIND

- 1 Light finish and weight saving graphics
- 2 90° fibre layer
- 3 45° Biax fibre layer
- 4 Extra strong heel wood patch
- 5 Biax Glass heel force patch
- 6 90° fibre reinforcement layer
- 7 High density PVC sandwich core
- 8 Biax Glass reinforcement
- 9 90° Glass reinforcement layer
- 10 Ultra light fibre layer
- 11 Biax Glass T-Stringer
- 12 Super light EPS core

When combined with the sandwich construction, this high quality Full Biax Glass and full PVC specification provides an optimised weight/stiffness/flex ratio.

PERFORMANCE FEATURES

- › Absorbs force from impact extremely well due to 45/45 degree weave, and achieves maximum strength via an extra layer of fibres on top with a 90 degree weave
- › Light and durable
- › Full PVC construction
- › Biax Glass T-Stringer for maximum stiffness
- › Light weight finish

CBC: CORK FLAX / BAMBOO COMPOSITE LIGHT FINISH TECHNOLOGY

GECKO ECO

- 1 Light Finish and weight saving graphics
- 2 Ultra light fibre layer
- 3 Uni-Directional natural Flax Fibre layer
- 4 Extra strong heel wood patch
- 5 Natural Cork Sandwich core
- 6 90° Glass reinforcement
- 7 Ultra light fibre layer
- 8 Super light EPS core

Built with Flax, Cork, Bamboo and Bio Resin instead of the classic Glass and PVC sandwich, our Eco technology uses sustainable plant based raw materials wherever possible, without compromising performance.

PERFORMANCE FEATURES

- › Natural Flax fibre composite offers a very good strength/weight/flex ratio and replaces the classic oil based Glass/Carbon composite layup
- › Cork sandwich is not only a natural source, but it also brings superior shock absorption properties and replaces the oil based PVC sandwich
- › Sicomin's GreenPoxy® Bio Resin contains a higher degree of plant based elements than traditional resin. Bio Resin is used in all models throughout the Fanatic range
- › Bamboo is used across the entire base of the board for superior optics and a unique flex response

**FULL BXC AND BXC:
FULL BIAX CARBON SANDWICH
LIGHT FINISH TECHNOLOGIE (DECK AND BOTTOM)**

FALCON TE, FALCON FORMULA, FALCON SPEED

- 1 Light finish and weight saving graphics
- 2 Biax Carbon layer
- 3 Biax Carbon heel force patch
- 4 High density PVC sandwich core (low density in nose)
- 5 Biax Carbon reinforcement
- 6 Biax Carbon reinforcement layer
- 7 Ultra light fibre layer
- 8 Wood rail reinforcement patch
- 9 Biax Carbon rail patch
- 10 Super light EPS core

This top quality and technologically advanced high-spec Biax Carbon, has a perfect weight/stiffness ratio as a result of its very fine weave and dynamic flex. Full Biax Carbon is used on the deck and bottom of the bigger Falcons and Falcon Formula for maximum stiffness and lightest weight possible.

On the smaller 89 – 98 Falcons and on the Falcon Speed boards, it is used solely on the deck for better flex of the board in choppy conditions. When combined with the PVC sandwich technology and Glass reinforcements, the Biax/Carbon provides a balanced stiffness/flex/weight ratio.

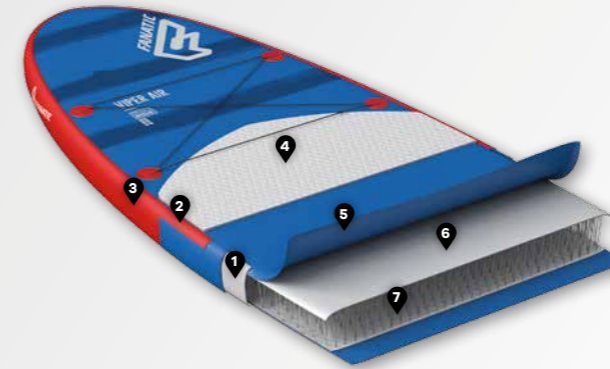

**HRS:
HIGH RESISTANCE SKIN**

GECKO, VIPER, RIPPER

- 1 HRS finish and weight saving graphics
- 2 Glass HRS layer
- 3 Heel Glass patch
- 4 Wood sandwich from tail to center
- 5 Glass reinforcement layer
- 6 Ultra light fibre layer
- 7 Glass rail reinforcement
- 8 Super light EPS core

High Resistance composite technology is a durable construction for everyday use. A thick, durable outer skin gives the hull maximum strength, as well as making it ding and impact resistant. Strategic use of fibre reinforcements ensure adequate stiffness. In combination with the user-friendly EVA deck, HRS can be seen on the standard Gecko, as well as the Viper/Ripper ranges.

**DL HD
DOUBLE LAYER HEAVY DUTY TECHNOLOGY**

VIPER AIR WS

- 1 First PVC rail layer
- 2 Extra rail-band reinforcement
- 3 Second PVC rail layer
- 4 Diamond grooving footpad
- 5 Strong and printed Tarpaulin layer
- 6 First Tarpaulin layer
- 7 V-Drop Stitch core

Built to last, our Double Layer (HD) technology is an inflatable construction for heavy duty usage. The triple layer rail construction ensures incredible stiffness and durability. Stiffness and performance is guaranteed, as the Double Layer HD Technology can take more than 20PSI of air pressure if needed.

**PURE
DROP STITCH LIGHT**

VIPER AIR PURE WS, RIPPER AIR PURE WS

- 1 First PVC rail layer
- 2 Second PVC rail layer
- 3 Diamond grooving footpad
- 4 Strong Tarpaulin layer
- 5 V-Drop Stitch core

Our single layer Drop-Stitch Light technology provides a quality construction without reaching deep into your pockets. Still produced at one of the world's most renowned manufacturers, this inflatable technology is created with top quality materials and production standards you'd expect from Fanatic.

TEXTREME® TECHNOLOGY

TXTR / BXIC AND TXTR / BXC:
TEXTREME® / BIAx (INNEGRA) CARBON
LIGHT FINISH TECHNOLOGY

FREEWAVE STB TEXTREME®, BLAST TEXTREME®

- 1 TeXtreme® Carbon reinforcement patch
- 2 Full Oxeon TeXtreme® bottom finish

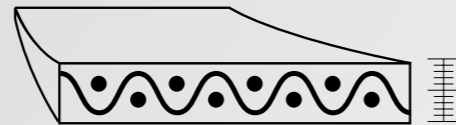

Lightweight. Stiff. Incredible. The TeXtreme® line is the most exclusive, high-performance construction in windsurfing. The Oxeon-built fabric allows for incredibly light PVC sandwich layups, with the added bonus of fully visible Carbon bottom graphics.

High quality, full Biax Carbon on the remaining parts of the deck of the Blast TXTR round off the TeXtreme® construction to create the lightest and stiffest board on the market, with crisp characteristics.

On the FreeWave STB TXTR, the TeXtreme® takes advantage of Innegra's Resin absorption ability, weight reduction, stiffness, impact protection and UV-resistance, to create the strongest board possible in the lightest and stiffest board construction available today.

Less resin, more strength, less weight; it doesn't get better than TeXtreme®.

CONVENTIONAL CARBON FABRICS
(REGULAR TOW)

TEXTREME® CARBON FABRICS
(SPREAD TOW)

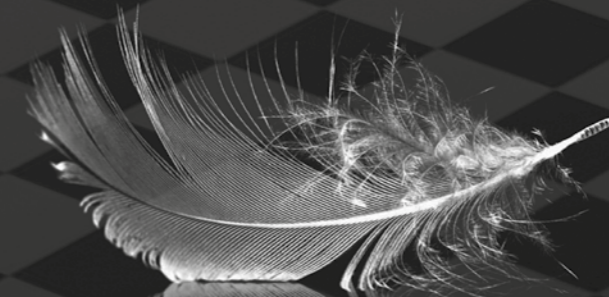

SPREAD TOW FABRICS FOR ULTRA LIGHT COMPOSITES

- 1 The Spread Tow structure makes it possible to achieve thinner laminates.
- 2 Straighter fibers with reduced crimp optimize and strengthen the composite.
- 3 Lower crimp reduces the amount of excess plastic, thereby minimizing weight.

GRIP TE OUR NEW ALL-IN-ONE WAVE WEAPON

—
INTERVIEW WITH FANATIC WAVE R&D
MANAGER AND PWA PRO KLAAS VOGET
ON THE GRIP TE

FANATIC

You've kicked the very successful Quad and TriWave models out of the range for 2018 and replaced them with one line called the Grip. What's the idea behind this reduction? Don't you think something is missing?

After our TriWave was relaunched two years ago with an incredibly early planing shape, Victor (Fernandez) and I started experimenting with different boards based on the ease of use and planing performance of the TriWave, with the extra turning abilities, which we liked in our Quads. With some adjustments to the TriWaves rocker line and bottom shape we've found a combination which loosened the board up – especially when used with a Quad setup – to allow even quicker reactions than with the Quad, but still keeping the incredibly fast and early planing level of our TriWave. It turned out to be that one shape we pulled out of our bags wherever we went – from the Canaries, to the North Sea, Cape Town and even Hookipa – even though we had all the options of more specific custom boards for a certain type of conditions. Anyone who tried one of these boards wanted to buy them straight away and called them the best and most complete Waveboard they've ever tried. After using these boards all around the world for about two years we're confident that it will be loved by both, our previous TriWave, as well as our previous Quad customer – plus everyone else who likes to keep it simple and wants the ultimate one Waveboard.

If it's so good in everything – why do you still offer the Stubby? Who should get a Stubby and who needs the Grip?

The Stubby is a favourite amongst sailors who want to get the most out of average conditions, but still score that sick day every now and then. Its planing character and turning is unique and the upwind ability is outstanding! The Stubby will blow your mind when you least expect, but still keeps up when the conditions get really good.

The Grip is on the other end of the spectrum. It's a modern version of a classic wave outline with a more nervous feel to it, while the Stubby has this super stable planing through its parallel rails. The Grip wants to turn, it excels in good sideshore conditions, but still delivers all that's needed when the power of the wave fades away and the wind swings onshore.

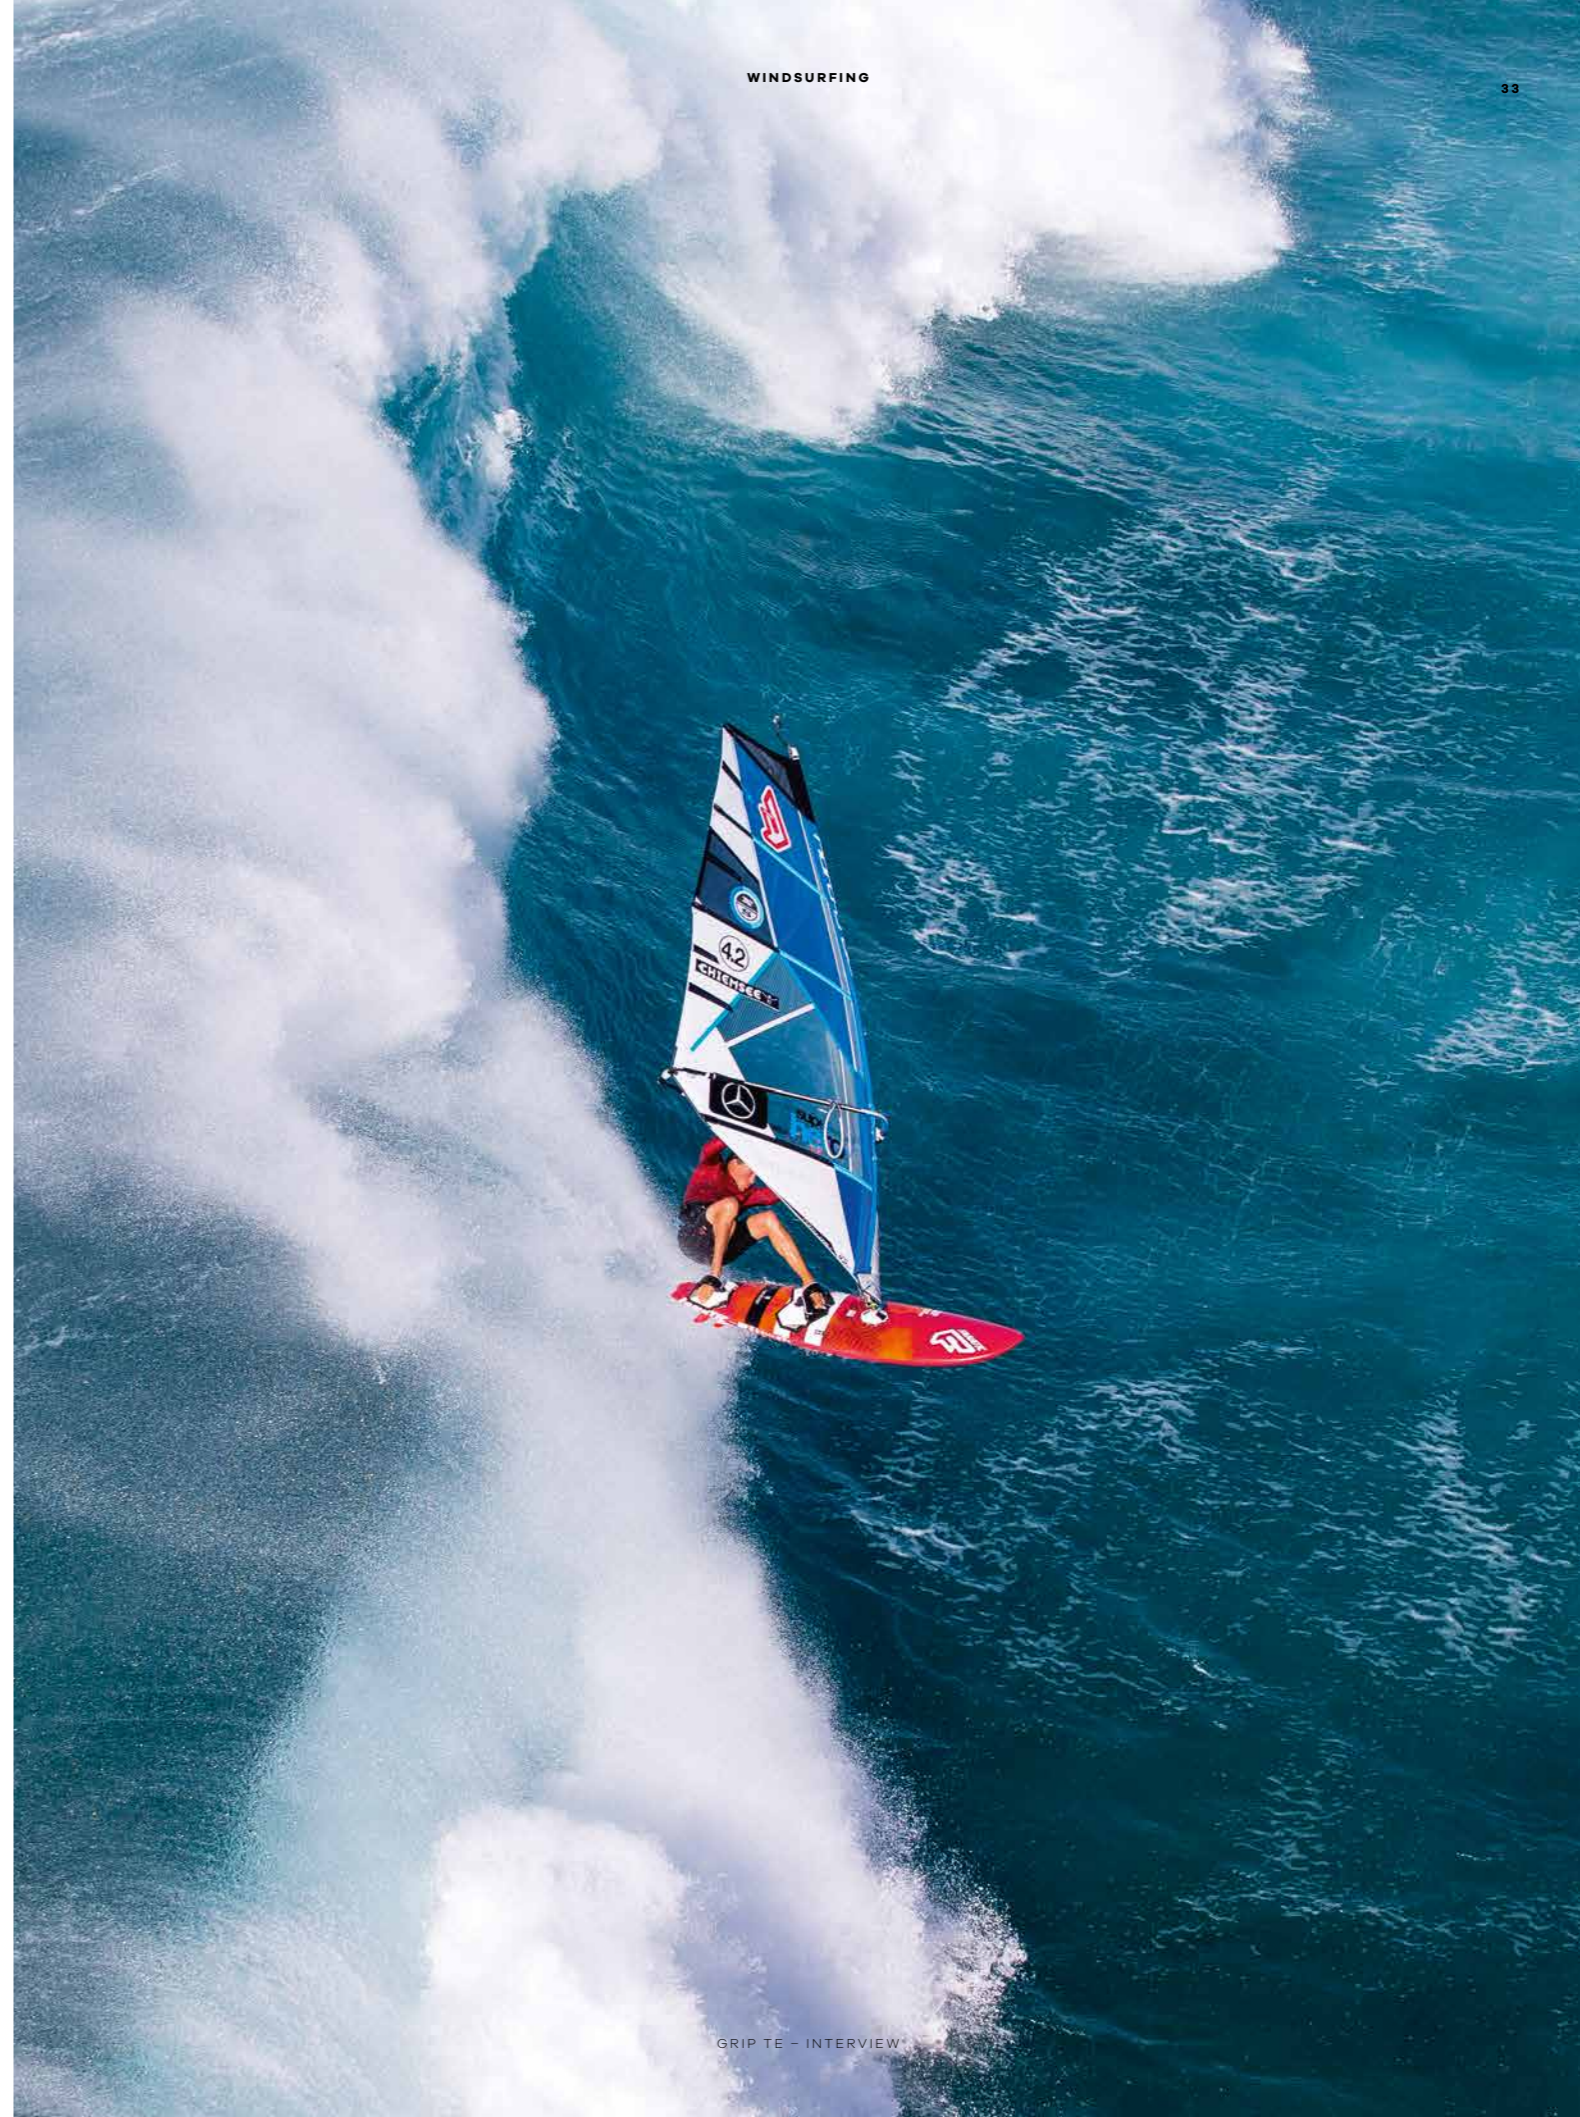

Both boards are very user-friendly and both shapes have collected trophies in PWA competitions. You can use both boards everywhere, it's a question of style and the conditions that you sail in most regularly.

Why the name Grip? What does it stand for?

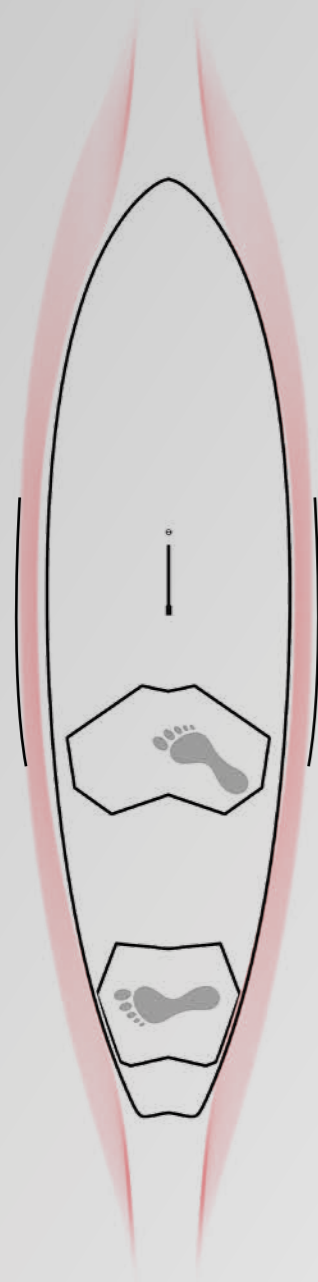

The name defines the actual amount of grip and drive you want per board size. You can setup the 3 medium sizes (76, 82, 89) of the Grip with pretty much all fin combinations out there, but we recommend the Quad and Thruster setup depending on the conditions you're sailing in and the amount of grip these conditions require. Our smallest Grip – the 68 – comes with 4 Slot Boxes only, as the Quad setup adds the amount of grip needed for windier and choppier conditions, as well as the turning potential for the lighter rider. The large Grip 99 comes with 3 fin boxes and a Thruster fin set for improved planing for lighter winds and lift under the back foot for the heavier and more powerful rider. The Grip 76, 82 and 89 are equipped with 5 Slot Boxes to ride them as either Quad or Thruster, depending on the riders size, level and conditions. They are supplied with our favourite Quad set and we offer a Thruster set as accessory.

To put it simply: Quad = more grip, more control, tight carving turns. Thruster = less grip, good planing, slashy and more slidy turns.

WINDSURFING

THE STUBBY CONCEPT

CLASSIC CONCEPT

Classic outline offers more length, which is forgiving in certain manoeuvres, jumps and choppy conditions. Curvier rails support turning, narrow tail offers control and grip also with smaller fins.

REDUCED LENGTH

Very wide nose and tail sections allow for shorter overall length, which reduces the boards swing weight, resulting in fast reactions and quick rotations.

PARALLEL RAILS

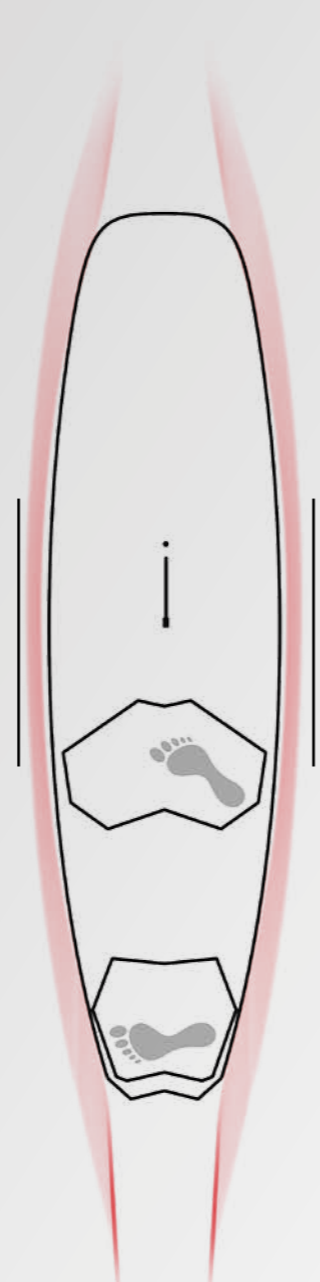

Narrow in the center, wide in tail and nose. The straighter rail outline results in a reduction of drag and increases the effective rail length that gets used in the turns for great stability and control.

TRIM AND STANCE

A fast rocker line guarantees early planing and speed, while the trim with the back foot right on the tail offers quick and tight turning.

STUBBY CONCEPT

Narrow center width and parallel rails offer great speed and stability in turns, compact length and stance gives a new sensation in turns and moves.

FUEL LING THE FUN

WITH NEW STYLES AND TRENDS TRICKLING INTO THE WINDSURFING INDUSTRY EACH SEASON, WE EMBRACE THE CHALLENGE OF CREATING PRODUCTS THAT CAN FUEL OUR ADDICTION TO RIDE.

ONE OF THE BIGGEST CRAZES WE'VE SEEN COME ABOUT THIS YEAR IS FOILING. SO IT WAS ONLY A MATTER OF TIME BEFORE WE PUT A LOT OF EMPHASIS ON DEVELOPING THE ULTIMATE FREERIDE / FOIL BOARD FOR 2018.

To enter the Foil market, we decided to focus on a model that could be dynamic enough to be used every day for Freeriding, as well as forgiving enough for those new to riding a Foil.

Our starting point was to select a model that was popular and with many user-friendly Freeride characteristics. The wider, thinner and with less volume concept of the Gecko, teamed with plenty of performance features gave our design team a lot to play with.

The main goal was to make a product that would shine both with, and without a Foil. Choosing the larger, more voluminous sizes of 120 and 133 got us off on the right foot. The success of wide compact outline also added to the overall Freeride performance with its early planing and manoeuvrability. The increased length and parallel outline delivers stability and planing support, whilst the high performance scoop rocker line and flat deck transitioning out into thinned rails ensures the ultimate carving experience. So with the Freeride attributes of the board mastered, it was time to focus on the specific Foil features.

When riding a Foil there's a significant amount more load that the board has to endure, so our next task was to reinforce those vulnerable areas.

First up was the Tuttle Box. We created much deeper space to accommodate the Foil, reinforcing it with Biax fibre to cope under the pressures that are created when rising up. The new Deep Tuttle Box is also able to accommodate a Freeride fin, and is light for superb planing performance. Another area that needed some attention was the nose of the board. The fuller nose outline of the Gecko, has been implemented into the Gecko Foil in order to combat potential stalling or submerging of the board when coming down off the Foil. By adding extra reinforcements to the area, we're able to establish a board that is durable enough to withstand crashes and surprises when learning to Foil, without affecting Freeride performance.

We designed the Gecko Foil's performance around the new Fanatic Foil Flow H9, and there's no doubt it's a winning combination. However, for windsurfers who already own a Foil, the Gecko Foil will also work with other brands as long as the Foil fits with the Deep Tuttle Box.

The new Gecko Foil opens up a whole new way of riding with minimum hassle. Accessible to all, it brings an additional element of fun to every session.

FLOW H9 FREE FOILING

ART. NO.: 13800-3510

OUR ENTRY LEVEL FLOW H9 FOIL BRINGS NEW AND EXCITING SENSATIONS TO THE AMAZING SPORT OF WINDSURFING.

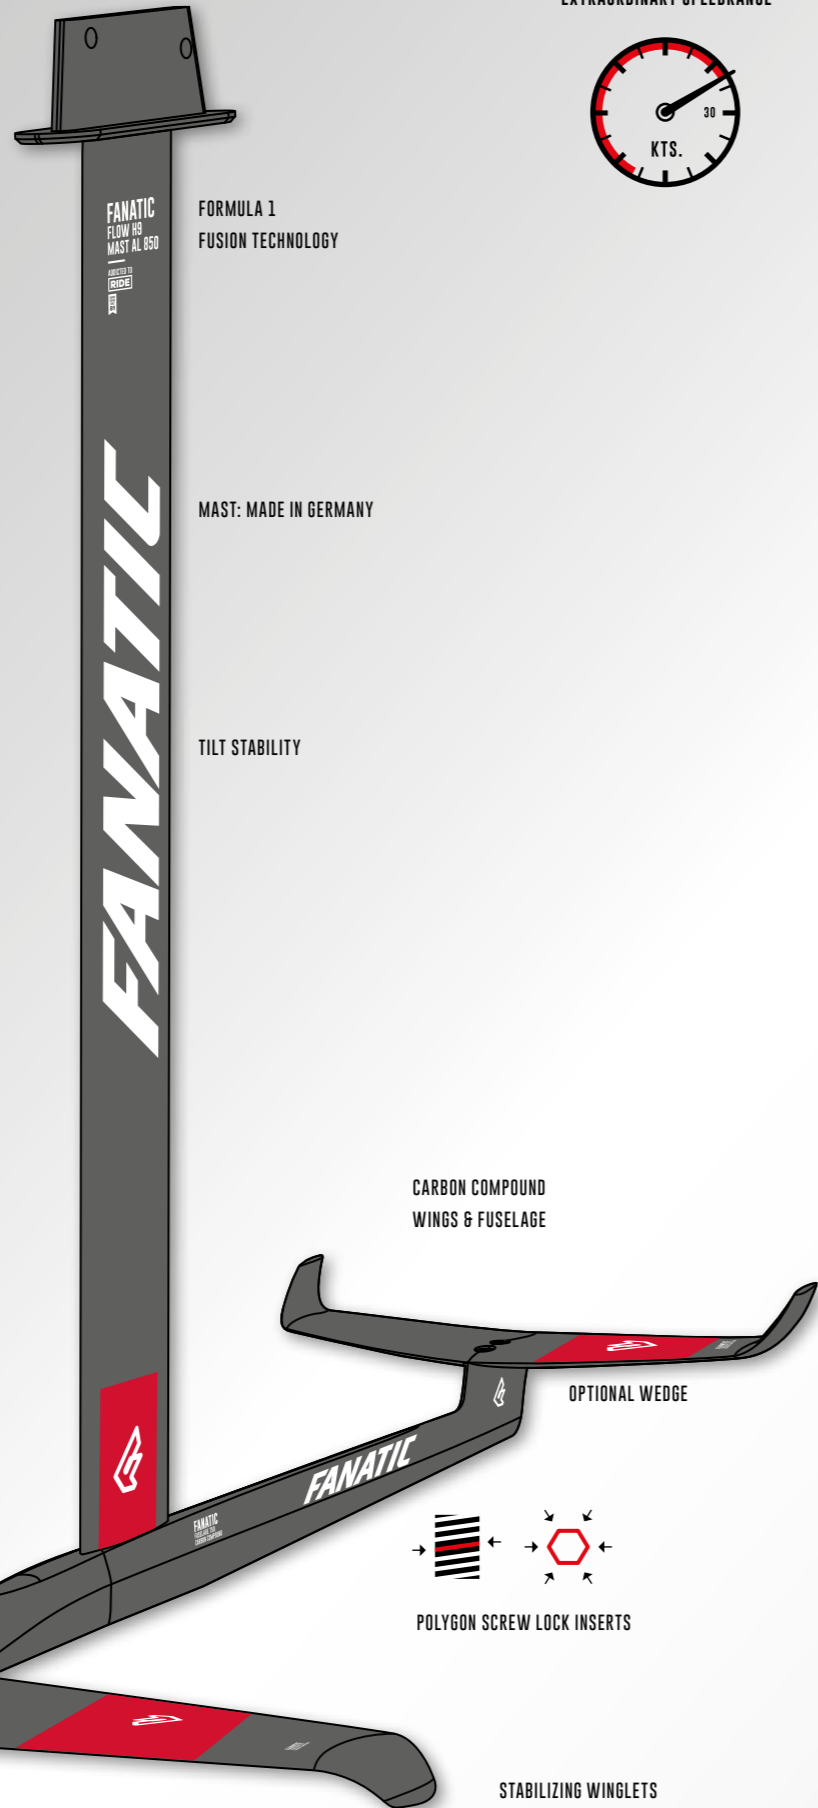

With a high specification Aluminium mast, it's strong and extra stable with a solid Deep Tuttle connection to prevent bending.

Taking durability to the next level, the wings and fuselage of our Flow H9 are made from Carbon Compound as opposed to the GFK/Carbon layup often seen in other brands.

The design and functionality of the Fanatic Foil make it incredibly user-friendly creating effortless lift with smaller sails and in lighter winds. Our focus is 100% on control, accessibility and progression as opposed to high performance. That said, the top speeds of our Foil make it highly competitive yet manageable.

Believing that everyone should have the opportunity to enjoy this exhilarating ride, our entry level Flow H9 is great value for money, easy to use and premium quality.

EXTRAORDINARY SPEEDRANGE

FORMULA 1 FUSION TECHNOLOGY

MAST: MADE IN GERMANY

TILT STABILITY

CARBON COMPOUND WINGS & FUSELAGE

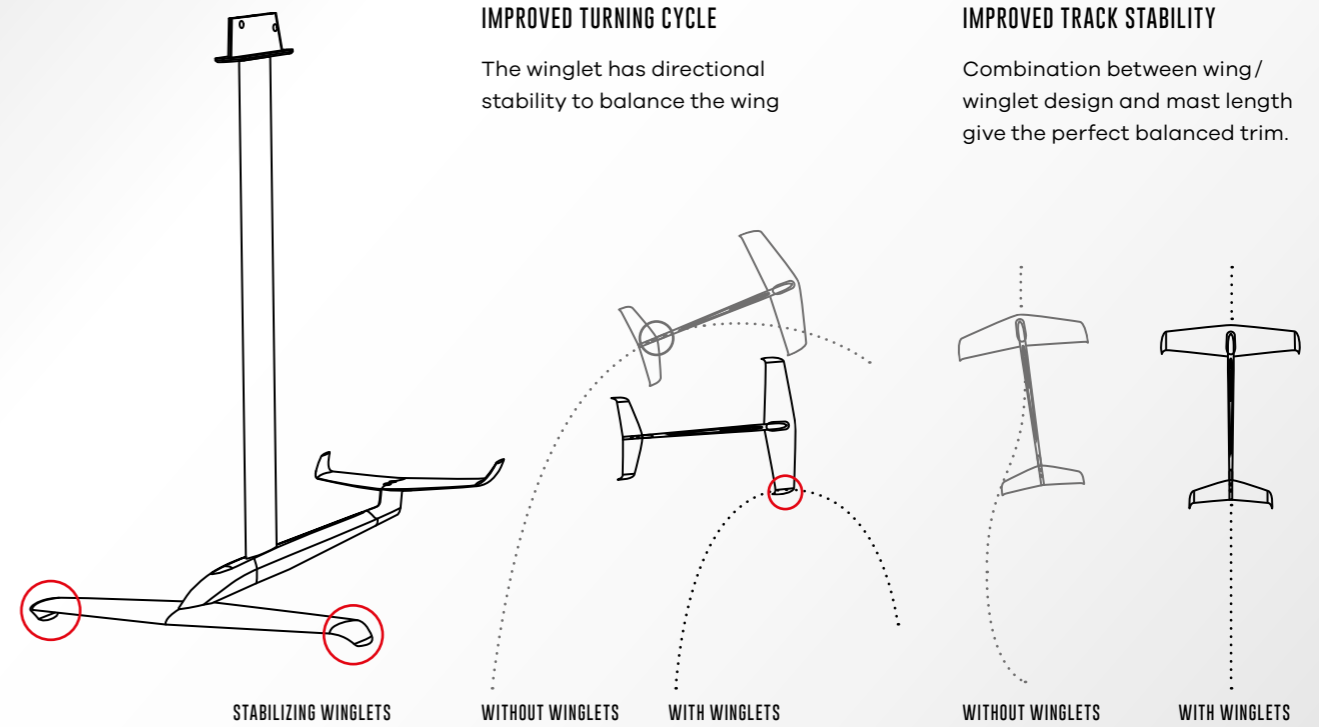

OPTIONAL WEDGE

POLYGON SCREW LOCK INSERTS

STABILIZING WINGLETS

WINGLETS

IMPROVED TURNING CYCLE

The winglet has directional stability to balance the wing

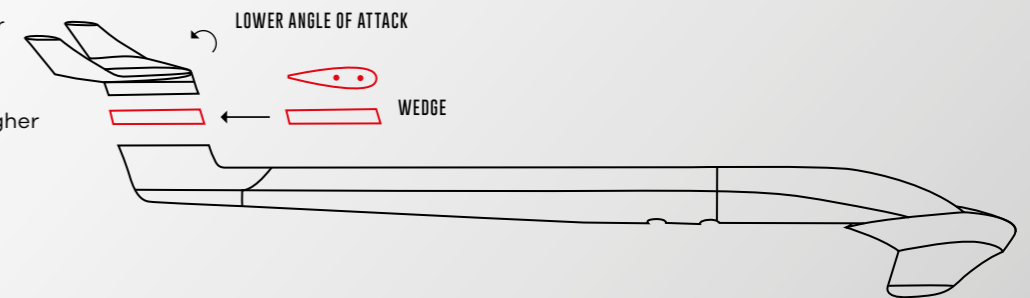

IMPROVED TRACK STABILITY

Combination between wing/winglet design and mast length give the perfect balanced trim.

OPTIONAL FEATURE:

WEDGE

Removing the wedge changes the angle of the back wing, for earlier lift in light winds, quite helpful when learning foiling. Adding the wedge allows a higher end speed / more control.

WATER CHARACTERISTICS

WATERSURFACE

WITHOUT WEDGE: ACCELERATES FASTER

WITH WEDGE: MORE CONTROL

GRIP TE RADICAL WAVE

ART. NO.: 13800-1001

THE GRIP IS OUR NEW ALL-IN-ONE WAVE WEAPON. THE FAVOURITE BOARD OF WORLD CHAMPION VICTOR FERNANDEZ, YOU'RE GOING TO LOVE THIS RED HOT PERFORMANCE STICK TOO. SET YOUR GRIP AND RIP!

PWA Wave World Champion Victor Fernandez sealed the deal in 2016 with the exact same shape of the new Grip under his feet. His impressive sailing in the Canaries, North Sea and Maui saw him deliver the goods in everything from onshore, to down-the-line conditions. Finely tuned over a period of over two years, the Grip has the planing power of our previous TriWave and turning capabilities beyond the Quad. Customise the amount of grip you want through your fins. The small 68 comes with a grippy and controlled Quad setup. The floaty 99 has a loose and early planing Thruster set. The 3 medium sizes are equipped with the adaptable 5 box feature and Quad fins, giving you the freedom to setup your Grip however you like. From back to front foot riding, intermediate to World Champ level, the carefree and intuitive Grip is designed to follow your lead.

KEY FEATURES

- › Five fin boxes for adaptable multi fin use according to personal preference (68 4 boxes, 99 3 boxes)
- › Innovative rocker line with flat spot concept and curved sections
- › Double concave/V bottom shape for a controlled fast ride
- › Fast rocker line with higher entry and opening V off the tail
- › Backwards oriented trim for direct turning reactions
- › Compact outline/wide swallow tail for snappy turns, lots of spray/lift/stability
- › Sidefins with slight toe for smooth water flow, reduced drag and speed
- › Flat deck for a stable stance and secure feeling even when the wind drops
- › Fast and super smooth turning RTM Quad fin setup (99 with MFC Thruster)
- › Lightweight and easy to adjust Slot Box system (99 with US Center Box)

VICTOR FERNANDEZ

- › EARLY PLANING AND FAST
- › ADAPTS EASILY TO THE CONDITIONS
- › SNAPPY AND CARVING SURF STYLE
- › PROGRESSIVE WAVE ACTION

STUBBY TE RADICAL WAVE

ART. NO.: 13800-1000

THE FANATIC STUBBY REPRESENTS THE BENCHMARK OF A NEW STYLE OF WINDSURF SHAPES! RADICAL LOOKING YET SUPER EASY TO USE, IT SURPRISES WITH SPEED, PLANING STABILITY AND A DIFFERENT SENSATION IN THE WAVES. THIS YEAR THE LINE GOT EXTENDED TO FOUR SHAPES FROM 76 TO 99. EXCITED? YOU SHOULD BE.

Fanatic introduced this exciting parallel rail concept with its super compact length into the windsurfing world in early 2015, after a secret and intense year of R&D. Soon the market followed and jumped on the train, but the success and feedback on the fully developed, finely tuned Stubby showed that this was something people wanted! Everything is easy: speed and early planing, control and slappy turns. Its characteristics open up the potential to learn all of the latest moves, and with a new sensation for almost every style of wave conditions it has an incredibly wide range of use. Try it to believe it, then you'll realise what all the fuss is about!

KEY FEATURES

- › New Stubby 82, 89 and fine tuned 76 and 99
- › Straighter, more parallel fuller rails for reduced drag and a cleaner waterline
- › Short and wide ›Stubby-Nose‹ – reduced length – for less swing weight, fast change of direction/rotations and easy recovery from steep re-entries/jumps
- › Wide double diamond tail for planing power tail-channel for extra drive/control
- › Reduced center width for speed and a straighter rail flow
- › Trim and stance moved backwards to adapt to length/ tail width/rocker line
- › Larger Trifin set matching the board's wide tail for lift/ drive/upwind ability
- › Constant V with slight double concave for controlled planning /comfort in chop
- › Slight tow-in side fins and channel edges for ideal water flow/less drag

KLAAS VOGET

- › SUPER COMPACT PARALLEL RAIL CONCEPT
- › REDUCED SWING WEIGHT
- › EASY AND CONTROLLED
- › SLASHY AND SNAPPY SURF STYLE
- › EASY WAVE MANOEUVRES
- › INCREDIBLE UPWIND ABILITY

FREEWAVE STB

WAVE / FREESTYLE

ART. NO.: 13800-1006 (TXTR), 13800-1005 (TE)

A NEW ERA HAS BEGUN! THE FREEWAVE STB IS THE INNOVATIVE DESIGN THAT HAS REPLACED THE 10 YEAR SUCCESS STORY OF THE CLASSIC FANATIC FREEWAVE, BEATING ITS PREDECESSOR IN EVERY ASPECT.

Following the success of the Stubby over the past two years and its positive aspects of planing, control and manoeuvrability, it wasn't long until the FreeWave STB was born. A slightly longer, faster, more bump & jump oriented design with guaranteed easy wave performance, flying over any kind of surface like a missile. The sizes 85, 95, 105, plus the brand new 115 are available in our super high-end TeXtreme® construction, as well as in our high-performance TE version in BXIC technology.

KEY FEATURES

- › New 115 version for the stronger rider and light wind days
- › Fine tuned fin positions for increased turning and planing stability
- › Straighter, more parallel rails for reduced drag and a cleaner waterline
- › Shorter and wider ›Stubby-Style‹ nose – for reduced swing weight/fast change of direction/ plenty of surface area for early planing and ease of use
- › Wide double diamond tail for planing power
- › Reduced center width for speed and a straighter rail flow
- › Trim and stance moved backwards to adapt to the board's length/tail width/rocker line and rocker line for snappy turning
- › Larger Thruster Fin setup for lift, drive and upwind performance (FW 115 Single Fin/Slot Box cover)
- › Constant V with slight double concave for easy controlled planning/comfort in chop
- › Full rails for stability, thin tail provides grip through turns
- › Slight toe in side fin boxes for ideal water flow with minimum drag
- › Power Box center fin with Slot Box side fins / covers to switch single and multi fin

- › COMPACT PARALLEL RAILS CONCEPT
- › EARLY PLANING, FAST, EASY AND CONTROLLED
- › SNAPPY TURNING
- › HUGE RANGE OF USE
- › SPORTY AND CRISP – FREEWAVE 2.0

FREEWAVE STB

WAVE / FREESTYLE

ART. NO.: 13800-1007

A NEW ERA HAS BEGUN! THE FREEWAVE STB IS THE INNOVATIVE DESIGN THAT HAS REPLACED THE 10 YEAR SUCCESS STORY OF THE CLASSIC FANATIC FREEWAVE, BEATING ITS PREDECESSOR IN EVERY ASPECT.

Following the success of the Stubby over the past two years and its positive aspects of planing, control and manoeuvrability, it wasn't long until the FreeWave STB was born. A slightly longer, faster, more bump & jump oriented version of our Stubby TE, the FreeWave STB is pure dynamite and the start of a new era for the FreeWave line. Guaranteed easy wave performance, the board flies over any kind of surface like a missile. The sizes 85, 95 and 105 are available in our affordable Biax fibre version.

KEY FEATURES

- › Fine tuned fin positions for increased turning and planing stability
- › Straighter, more parallel rails for reduced drag and a cleaner waterline
- › Shorter and wider ›Stubby-Style‹ nose – for reduced swing weight, fast change of direction, plenty of surface area for early planing and ease of use when jumping and tacking
- › Wide double diamond tail for planing power
- › Reduced center width for speed and a straighter rail flow
- › Trim and stance moved backwards to adapt to the board's length, tail width and rocker line for snappy turning
- › Thruster fin box setup, delivered with FreeWave single fin and Slot Box covers to switch between single and multi fin use
- › Constant V with slight double concave for easy and controlled planing, as well as comfort in choppy conditions
- › Full rails for stability, thin tail provides grip through turns
- › Slight toe in side fin boxes for ideal water flow with minimum drag

THE SHOWSTOPPER

GOLLITO ESTREDO

SKATE TE FREESTYLE

ART. NO.: 13800-1008

THE SKATE TE IS THE BOARD OF 7 × FREESTYLE WORLD CHAMPION GOLLITO ESTREDO. HIS SPEED, POWER, AND STYLE IS BUILT INTO THE FOUNDATIONS OF THIS BOARD MAKING IT A PREMIUM PRODUCT WITH LIMITLESS POSSIBILITIES.

Crazy acceleration, top speeds and explosive >pop< happen in seconds, so every gust counts for you to pick the right spot and unleash your rotations. The Skate TE comes in four sizes from 86 to 108. Each size cleverly matches the conditions most sailed in, whilst the super quick rocker is responsible for its remarkable speed and early planing. Combined with extra tail power, you are able to leave the water at any time, with smooth transitions from aerial moves into sliding tricks. An integrated arch support in the tail pad, combined with our light yet strong Biax Innegra Carbon (BXIC) construction rounds up the sensation and excellence you'd expect. There are no limits to your creativity with this board of a champion.

KEY FEATURES

- > Super quick rocker line for instant top speed
- > Power V bottom shape for constant control and easy sliding
- > Finely tuned tail shape for fastest acceleration and a livelier, quicker reaction
- > Reverse length concept supported by the compact outline
- > Soft nose rails for smooth transition into sliding moves
- > More compact and with less nose area for reduced swing weight and even faster rotations (Skate TE 93)
- > Feedback and comfort provided by the integrated arch support in the tail pad
- > Double footstrap inserts for maximum load and adjustable stance settings for tighter fit or personal preference
- > Power Box for maximum durability in shallow waters

ADRIEN BOSSON

- > PROGRESSIVE FREESTYLE SHAPE

THE TRENDSETTER

GECKO LTD FREERIDE

ART. NO.: 13800-1013

THE GECKO IS THE MOST USER-FRIENDLY AND FUN FREERIDEBOARD WE'VE EVER HAD IN THE LINEUP. THE GECKO LTD IS THE FLAGSHIP OF THIS SUCCESSFUL AND POPULAR RANGE, AVAILABLE IN SIX EXCITING SHAPES. JUST STEP ON, HOOK IN AND GET READY FOR A WHOLE LOT OF FUN!

The general concept behind the Gecko is wider, thinner and with less volume. These attributes offer a great deal of balance and stability for easy gybing, as well as a fun responsive feeling beneath your feet. The increased length and more parallel outlines in the larger sizes (120+) cater to the rider's needs with extra stability and planing support. Regardless of your level, the Gecko will carry you through your gybes or have you planing in the footstraps for the first time. With plenty of performance features built in, the Gecko will execute any move effortlessly. The perfect companion for your progression, it will leave nothing but a smile on your face.

KEY FEATURES

- › Reduction in drag and enhanced control due to 75 degree pintail
- › Wide compact outline for early planing and easy manoeuvres
- › Increased length and more parallel outlines for the larger sizes (120+) supplying stability and planing support
- › High performance scoop rocker line with a higher entry and flat tail release
- › Flat deck transitioning into thinned out rails for the ultimate carving experience with a secure stance
- › Flat panel power V bottom shape with a slight double concave on the bigger sizes for easy planing and control
- › Premium full PVC Biax Fibre Technology (BXF) for a light and crisp ride with plenty of performance attributes

ADAM LEWIS

- › WIDE AND THIN FREERIDE CONCEPT
- › SUPER STABLE
- › PASSIVE PLANING
- › INCREDIBLY EASY TO GYBE
- › COMFORTABLE AND FORGIVING

GECKO FOIL EDITION

FREERIDE

ART. NO.: 13800-1014

ENTER A NEW WORLD OF RIDING SENSATIONS WITH OUR GECKO FOIL. SWITCHING EFFORTLESSLY BETWEEN A FREERIDE WINDSURFER AND A FOIL BOARD, IT OFFERS EVERYTHING YOU NEED TO JUST HAVE FUN!

Following strong requests from several foil specific brands, and riders all asking for a Gecko with a Foil Box, we decided to go ahead and do it! The perfect starting point into the rapidly growing foil world, we bring you the Gecko Foil Edition.

The Gecko Foil Edition offers just enough area and lift in the nose to always stay above the surface in the early stages of foiling. Once you're up and on the foil, the board keeps its smooth and comfortable character. As it comes in the original Gecko shape, the Gecko Foil remains the same easy Windsurf ›Funboard‹ if you prefer to feel the waters' surface under your feet.

The sizes we've chosen for the Gecko Foil Edition (120 & 133) have an increased length and more parallel outline, creating extra stability and planing support. Coming in our pristine and lightweight LTD construction and with plenty of performance features built in, the Gecko Foil is the perfect companion for your progression whatever setup you choose to ride.

KEY FEATURES

- › Foil specific Gecko versions (120 & 133) with a reinforced nose area and strong Deep Tuttle Foil box
- › Tuttle and medium Tuttle base
- › LTD construction (Biax fibre/Full PVC sandwich Light Finish technology)
- › Delivered with Tuttle Box Freeride fin
- › Wide compact outline for early planing and easy manoeuvres
- › Increased length and parallel outline creates stability and planing support
- › High performance scoop rocker line with a higher entry and flat tail release
- › Flat deck transitioning into thinned out rails for the ultimate carving experience with a secure stance
- › Flat panel power V bottom shape with a slight double concave for easy planing and control

GECKO ECO EDITION

FREERIDE

ART. NO.: 13800-1020

THE GECKO ECO IS MORE THAN JUST A FIELD STUDY OF WHAT'S POSSIBLE IN TERMS OF ECO-FRIENDLY TECHNOLOGY IN WINDSURFING. BUILT WITH FLAX, CORK AND BAMBOO INSTEAD OF A CLASSIC GLASS AND PVC SANDWICH, IT EMBODIES OUR OCEAN MINDED SPIRIT LIKE NO OTHER BOARD – AND HAS ITS VERY OWN LOOK AND FEEL.

We at Fanatic have been focused on sustainability for years, exploring the options to build and deliver more eco friendly products to the industry – you can see this by looking for our Ocean Minded logo on every Fanatic board we've produced in recent years. The Gecko Eco embodies this spirit like no other board in our range. Bio Resin is used throughout the entire Fanatic range, but the Gecko Eco and its field of use allows us to go further. A Flax/Cork sandwich in the deck and a beautiful Bamboo bottom leaves this board entirely without PVC, and reduces the use of Glass fibres to the minimum. No additional colours have been used under the reduced graphics, leaving the Gecko Eco's inner values to shine through the deck and bottom with pure beauty.

A special board with a unique flex creates a fun responsive feeling beneath your feet and less impact on the environment. Stay Ocean Minded!

KEY FEATURES

- › Eco friendly Flax/Cork and Bamboo layup
- › Superior optics through transparent Bio Resin
- › Wide compact outline for early planing and easy manoeuvres
- › High performance scoop rocker line with a higher entry and flat tail release
- › Flat deck transitioning into thinned out rails for the ultimate carving experience with a secure stance

GECKO FREERIDE

ART. NO.: 13800-1011,
13800-1012 (DAGGERBOARD)

THE GECKO IS THE MOST USER-FRIENDLY AND FUN FREERIDEBOARD WE'VE EVER HAD IN THE LINEUP. ITS SUCCESS AND POPULAR REPUTATION HAS GROWN THE GECKO RANGE TO A TOTAL OF SEVEN EXCITING SHAPES. JUST STEP ON, HOOK IN AND GET READY FOR A WHOLE LOT OF FUN!

The general concept behind the Gecko is wider, thinner and with less volume. These attributes offer a great deal of balance and stability for easy gybing, as well as a fun responsive feeling beneath your feet. The increased length and more parallel outlines in the larger sizes (120+) cater to the rider's needs with extra stability and planing support. Regardless of your level, the Gecko will carry you through your gybes or have you planing in the footstraps for the first time. With plenty of performance features built in, the Gecko will execute any move effortlessly. Additional footstrap options, plus daggerboard versions of the Gecko 156+ make this range the perfect companion for your progression from the first steps to planing through your gybes. It will leave nothing but a smile on your face.

KEY FEATURES

- > Reduction in drag and enhanced control due to 75 degree pintail
- > Wide compact outline for early planing and easy manoeuvres
- > Increased length and more parallel outlines for the larger sizes (120+) supplying stability and planing support
- > High performance scoop rocker line with a higher entry and flat tail release
- > Flat deck transitioning into thinned out rails for the ultimate carving experience with a secure stance
- > Flat panel power V bottom shape with a slight double concave on the bigger sizes for easy planing and control
- > Daggerboard version of the Gecko 156+

BLAST

PERFORMANCE FREERIDE

ART. NO.: 13800-1010 (TXTR), 13800-1009 (LTD)

THE BLAST HIT THE SCENE WITH A BANG! INSPIRED BY SOME OF OUR MOST SUCCESSFUL MODELS – THE STUBBY AND LIGHTNING FAST FALCON – THE BLAST DOES EXACTLY WHAT IT SAYS ON THE TIN. REPRESENTING EVERYTHING THAT GOT US HOOKED ON WINDSURFING IN THE FIRST PLACE, WE GUARANTEE YOU'LL HAVE A BLAST!

Evolving the Blast's parallel rail concept further has proven to be exceptionally beneficial in its early planing performance, control, and ease of use. Having tested a variety of different shapes, it turned out that the concept initially introduced by our Wave department to create the Stubby, would be the spice needed in designing the ultimate Freeride machine with extra power. Similar to the new FreeWave STB, the Blast blew everyone's mind once it hit the scene. As one of the most sought after Windsurf boards around, we've extended the line-up with the floaty Blast 145 in addition to the Blast 100, 115 & 130. Available in two constructions – the elite TeXtreme® Biax Carbon (TXTR/BXC) and our Biax fibre/Full PVC sandwich technology (BXF) – it's never been so easy to have the Blast of your life!

KEY FEATURES

- › New 145 Blast for an exciting ride when others just float
- › Straighter, more parallel rails for reduced drag and cleaner waterline
- › Compact ›Stubby-Style‹ nose for reduced swing weight and super responsive foot steering through gybes
- › Wide diamond tail for minimum drag and extra planing power needed through lulls/light winds
- › Slim center width and a straighter rail flow for speed
- › Trim and stance perfectly match the board's length, tail width and rocker line
- › Tuttle Box for easy performance upgrade through more specialized Slalom Fins (sizes 130 & 145 approved for Foil use)
- › Smooth and controlled ride over choppy water achieved via flat panel power V bottom shape, and a slight double concave from nose to center
- › Flat deck shape transitioning into thin, more defined rails for superior carving with maximum stability in the stance area

- › COMPACT PARALLEL RAIL CONCEPT
- › SUPER FAST AND CRISP
- › QUICK GYBES
- › SPORTY – FREERIDE 2.0

THE WINNING FORMULA

PIERRE MORTEFON, MARION MORTEFON

FALCON TE SLALOM

ART. NO.: 13800-1015

OVER THE PAST TWO YEARS, OUR FANATIC FALCONS HAVE WON MULTIPLE PWA EVENTS AND COUNTLESS NATIONAL TITLES, AS WELL AS TWO VICE WORLD CHAMPION TITLES AND TWO IFCA WORLD TITLES. IF YOU WANT TO BE A WINNER, TAKE A RIDE ON A FALCON!

The Fanatic Falcons are zero compromise racing machines with exceptionally fast acceleration. Their insane top speeds are complemented with full control at all times. The impressive early planing characteristics ensure that you're able to make some serious ground off the start line, and around every mark. Channeling the energy from the board in a straight line delivers full control at top speeds. After intense R&D, we've managed to bring a new 98 to the line, which matches the outstanding performance of the 89, used for the medium to high wind races. The premium Biax Carbon sandwich construction further intensifies the overall performance of this range. Why wait to win? Our red rockets are your ticket to success.

KEY FEATURES

- › Highly tuned new Falcon 98 following the lead of the successful Falcon 89
- › Finely tuned fin and mast position for early planing and acceleration
- › Super efficient cutout design for control and top speeds
- › Recessed mastfoot area for maximum control
- › Ergonomic rail design for grip and 100% power from start to finish
- › Optimised volume flow for balance and easy planing through lulls and gybes
- › Proven rockers delivering top speeds and control
- › Tuned bottom shape with fine adjustments for an overall winning formula
- › Premium Biax Carbon sandwich Light Finish technology for incredible weight and flex response
- › Sizes 129 & 136 approved for Foil use

JORDY VONK, PIERRE MORTEFON

- › 100% RACE PERFORMANCE WITH MINIMUM EFFORT
- › SUPER FAST ACCELERATION
- › INCREDIBLE TOP SPEEDS AND CONTROL
- › RESPONSIVE GYBING
- › WORLD CUP WINNERS!

FALCON LIGHTWIND SLALOM

ART. NO.: 13800-1016

ENTER THE WORLD OF LIGHT WIND EXCELLENCE WITH THE FALCON LIGHTWIND, AND ENJOY WHAT THOSE EMPTY LAKES AND LIGHT WIND DESTINATIONS HAVE TO OFFER. UP ON THE PLANE WITH MINIMUM INPUT, ITS EFFICIENCY IS PERFECTLY COMPLEMENTED BY EFFORTLESS TOP SPEEDS AND OUTSTANDING CONTROL. NO WIND, NO WORRIES!

The wide – 90cm – surface area means that getting up on the plane in even the lightest breeze is a problem of the past. The definitive weapon of choice for light wind racing, hit cruise control for competitive upwind reaches. With the extensive knowledge of our world class Slalom programme and the demands from champion riders packed into one board, no wind days just got fun! The Falcon Lightwind comes in our affordable Biax fibre construction and includes a Race fin for a complete ›ready to race‹ package.

KEY FEATURES

- › Specialized shape for light winds
- › Following the lead of the successful Falcon TE models
- › Finely tuned fin and mast position for early planing and acceleration
- › Super efficient cut out design for top control at high speeds
- › Recessed mastfoot area for maximum control
- › Ergonomic rail design for grip and 100% power from start to finish
- › Optimised volume flow for balance and easy planing through lulls and gybes
- › Proven rocker delivering top speeds and control
- › Special light wind inserts
- › Including Slalom Choco Fin Black Pearl 50 cm
- › Foil approved Deep Tuttle box

INSPIRING THE FUTURE

MAXI GERTENBACH, KLAAS VOGET, TOM GUILLO, MARÍA ANDRÉS

VIPER ENTRY

ART. NO.: 13700-1020, 13700-1021 (SV)

IF YOU'RE LOOKING TO GET INTO THE SPORT OF WINDSURFING, THEN THE VIPER IS YOUR TICKET TO RIDE! OUR YEARS OF EXPERIENCE AND THOROUGH KNOWLEDGE OF THE SPORT HAS ALLOWED US TO BUILD THE ULTIMATE WEAPON FOR NEW SAILORS TO GET STARTED.

The Viper epitomises all components needed to take the progressing rider from zero to hero. Giving confidence to newbies for those first steps onto the board, or speeding away in the harness, even using the footstraps for the first time, progression with the Viper will seem effortless.

The retractable daggerboard and robust Power Box fin offers up impressive versatility. For light wind manoeuvres full of flow, through to the more advanced Funboard, the Viper is the one-stop-shop for all your needs. Beginners and novices alike will relish in the softdeck padding, while the long and adjustable mast-track enhances the tuning characteristics of the board. The perfectly placed insert positions are based on feedback from experts in our school programme. Our High Resistance Skin (HRS) construction offers tough durability and gives great longevity across all of the available sizes, and five different widths. Available with classic Viper graphics or as plain white school version.

KEY FEATURES

- > Softdeck > No pain = gain!
- > CAD analysed power rocker line for optimum waterline
- > Retractable daggerboard provides great light wind tracking, while a sealable slot is available for high wind use
- > Multiple footstrap settings for great versatility – updated after feedback from experts in our school programme
- > Simple mastfoot steering, glide and control is ensured by the longer outline
- > Sleek pintail makes it easy to master the gybe
- > Carrying handles for easy transportation
- > Classic Viper graphics or plain white school version

VIPER AIR WS

ENTRY

ART. NO.: 13800-1149

WITHOUT A DOUBT THE VIPER AIR IS THE MOST DESIRABLE INFLATABLE WINDSUP EVER. PACKED WITH PURE FUN FOR THE WHOLE FAMILY, SCHOOLS AND CLUBS TO ENJOY, IT'S THE ULTIMATE WATERSPORTS TOY.

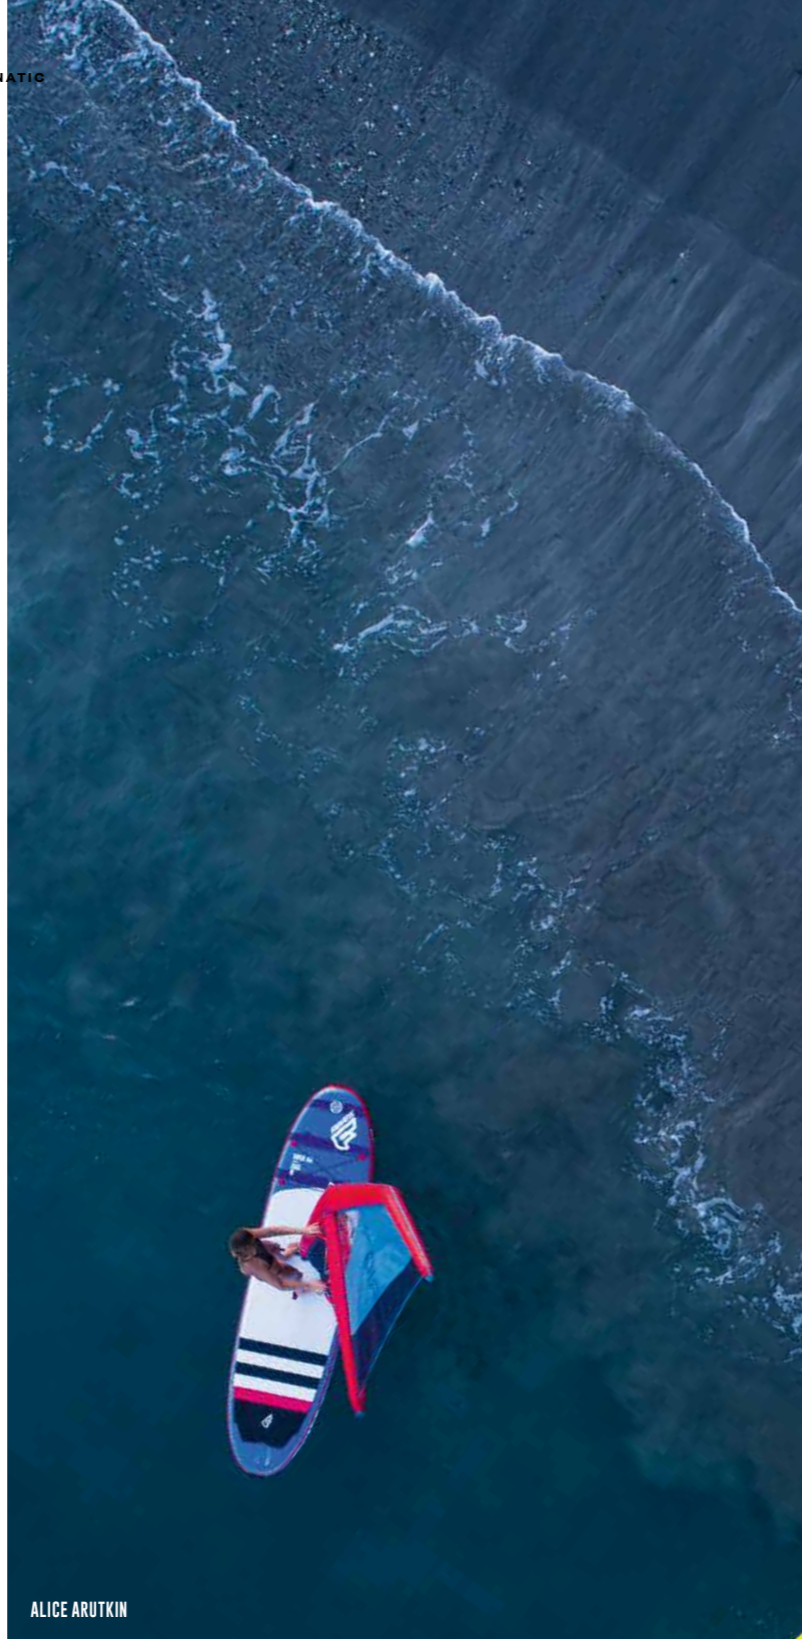

Windsurf enthusiasts and SUP lovers are equally stoked about the diversity that the Viper Air Windsurf has to offer. With years of experience in building the best entry level windsurf board, we made sure that the Viper Air is spiced with similar characteristics; optimum glide, stable platform, great turning potential and all-round manoeuvrability. Our high quality Double Layer HD technology delivers top stiffness and performance and silicon rail edges for a clean release. Our convenient all-in Backpack includes a Fanatic Power Pump HP2 for easy transportation and a quick setup.

Safe, straightforward and utterly sensational!

KEY FEATURES

- › Stretched outline with good glide, plenty of stability and flotation
- › High Quality Double Layer HD technology with top materials and manufacturing process
- › Comfortable and grippy footpad, towing eyelets and comfy carrying handle
- › Deck net to attach luggage
- › Excellent Wheely Backpack with padded straps, accessory compartments and belts for ease of transport
- › Fanatic Power Pump HP2 for quick and easy inflation
- › Mastfoot insert for windsurfing option

RIPPER KIDS

ART. NO.: 13700-1025

WITH OUR YEARS OF EXPERIENCE, EXTENSIVE KNOWLEDGE BASE AND TECHNICAL KNOW-HOW, WE'VE DEVELOPED A SETUP GUARANTEED TO GET THE NEXT GENERATION HOOKED ON WINDSURFING; A SPORT THEY CAN GROW PASSIONATE ABOUT AND ENJOY FOR YEARS TO COME.

With 7 children between them – Fanatic Brand Manager Craig Gertenbach, Fanatic UK Agent Nik Baker, and Shaper Sebastian Wenzel – they have all drawn on past experiences and needs of their younger riders, in order to develop a successful concept. The result, a perfect board/rig package to pass on the passion to the up-and-coming windsurfers. The Ripper comes as a soft version of the popular Gecko 112 shape, providing the much sought after light wind planing abilities and stable platform. Offering up a variety of footstrap options and removable center fin, it not only reiterates the versatility of the Ripper, but also certifies that it is in fact a board any grom can grow and advance with. The shape guarantees top speeds perfect for the adventurous thrill seeker, as well as adults looking to exhibit their skills on the very same board.

KEY FEATURES

- › Softdeck > No pain = gain!
- › Multiple footstrap options to adapt to junior's level and size
- › Wide compact outline for early planing and easy manoeuvres
- › High performance scoop rocker line accommodates progression
- › Flat deck transitioning into thinned out rails supports easy carving, and access for lighter riders
- › Removable center fin incl. box cover

MAXI GERTENBACH

- › ENTRY TO RIPPER LEVEL, SHAPED FOR KIDS
- › STABLE AND FORGIVING
- › SOFT AND GENTLE
- › ADAPTS TO LEVEL AND SIZE
- › EASY PLANING AND POWERFUL GYBES

RIPPER AIR WS PURE KIDS

ART. NO.: 13800-1147

ONCE YOU GET YOUR LITTLE RIPPERS OUT THERE, IT WON'T TAKE LONG UNTIL THEY'RE OUT THERE FOR HOURS. THE RIPPER AIR WINDSURF IS OUR INFLATABLE WINDSUP FOR KIDS. OPENING DOORS TO WATERSPORTS AND ADVENTURE, IT PROVIDES ENDLESS FUN AND ENTERTAINMENT TO KIDS AND PARENTS ALIKE.

The kids' version of our Viper Air Pure, the Ripper Air WS is the ultimate hassle-free toy to get the new generation out there. Enjoy the fun of Stand Up Paddling and get them hooked with windsurfing once it's blowing. A stable platform with great glide and manoeuvrability, it's soft and gentle on the knees and elbows. Our super lightweight Pure Air technology matches the rider's playful nature and strength, forming an easily transportable package. Two removable fins (rear & center) make it easy to switch from Windsurfing to SUP and adjust to your ripper's needs. Our Fanatic Power Pump HP2 rounds off this easy to use and super versatile package.

The Ripper Air Windsurf is the gift that keeps on giving!

DESCRIPTION	Both, Brand Manager Craig Gertenbach and Shaper Sebastian Wenzel, know how hard it is to find a good rig for their kids, which is why we created the Ripper rig! A sail that is light, durable, easy to use and most of all compact.			The Ride SUP rig is designed to power SUP boards fitted with mast tracks, and WindSUP boards like our Viper Air and Ripper Air. The perfect light wind WindSUP rig is easy to sail, straightforward to assemble, and convenient to store. Coming in an ultra compact, high quality nylon bag, it includes a mast, mastbase, extension, 3-pcs. boom and sail. Ready to rig and go, it takes 30 secs to assemble.			The Fanatic Ride rig is perfect for all windsurfers who want to keep it simple. No confusion or hi-tech over engineering, these sails are all about fun and freedom! The rigs are supplied complete with mast, sail, boom with uphaul, extension and mast foot, all in a handy bag to keep the parts together and organised for your next windsurfing session.		
DESIGN FEATURES	Compact sail design (short mast for easy uphauling) Durable but light Dacron Monofilm construction Lightweight one batten sail design Extra light mast and boom components			Light Dacron sail for a smooth power delivery and a light feeling 3-piece compact boom works as a normal boom but can be stored more easily Mastbase extension and boom with markings help setup the sail easily			Modern performance shape – a great all-round shape that will suit both modern and older style boards, with a huge wind/trim range High quality materials – best combination of durable yet light weight construction, especially in key stress areas Compact luff/boom length – makes the sail more compact and keeps components to minimum Batten tensioner – integrated hex key driven batten adjustment system; aerodynamic, effortless batten trimming
