GAASTRA KITEBOARDING

- 2018 -

Gaastra was one of the first watersport brands ever. It was established in 1897, and entered the scene as one of the first brands to kitesurfing in 2001. As holder of their own sailcloth factory, as well as kite and kite-accessory factories, Gaastra's highest priority is bulletproof quality through all our product range. The success of Gaastra always was and will be the teamwork and working with the best people in their areas. With their background, the access to the factories and all different kinds of materials and manufacturing processes, Gaastra will always be pushing their different sports to the next level.

R&D TEAM

Urs Hungerbühler is the "brain" behind GA Kites. His year is split between Taiwan for light wind testing and controlling the production process and Tarifa in the south of Spain testing and developing in windier conditions. Since 2015 Gaastra has started working together with Roy Rodwald as product development manager. Together they represent a new era for GA Kites. As one of the biggest global players, Gaastra has main distributors and test centers around the world developing and testing right at the heart of this fantastic sport.

For the 2018 season, with the help of Urs and Roy, GA Kites once again managed to reinvent itself and implement all new ideas into the new product range. With totally redesigned kites in the range there is the perfect kite for every rider (Spark, IQ, Pure, Pact). There are also two bars with adjustable width and line lengths, as well as three waveboards (90Seven Team, 90Seven Max, 90Seven Solar) and three twin tip boards (Blend, Watts, Pact) which complete the most comprehensive GA Kite range ever.

KITE TECHNOLOGY

- 2018 -

Quality and technology means everything to us. We put all our efforts into our products and solid manufacturing to make them long lasting, but still lightweight and performance oriented. Finding this balance is a constant challenge, but makes a huge difference in the end product. GA products come to you guaranteed to deliver the best performance available.

SEGMENTED AND SPLIT STRUTS

The struts are segmented in the front part for an exact adjustment and definition of the profile.
The back part of the strut is split for a stiffer back part of the strut and for a perfect radius control toward the TE.

DACRON

High density polyester dacrone, impregnated (waterproofed) and polyurethane coated for excellent dimension stability and low water absorption.

STRUT CONNECTION

Full circle connection for stiffest kite frame. Optimized very stiff connection between the LE and the struts allows perfect control of the sail tension at the front part of the profile.

LEADING EDGE SEAM

Reinforced on the inside with a light glued dacrone cloth. Glued and double stitched with a high density polyester thread and a more flexible nylon thread.

COMPUTER AIDED CUTTING

Fabric panels are cut on a computer controlled plotter.

COMPUTER SEWING

Reinforcements, connection points and all patches are computer sewed.

REINFORCEMENTS

- high density polyester dacron
- kevlar though (TM)
- heavy duty polyester fabrics

KOOK PROOF CONNECTIONS

Connections to the kite are kook proof. Impossible to mix up lines.

ANTI TANGLE WEBBINGS

Anti tangle webbings at the strut and LE ends to prevent line tangling and damage of the kite by tangled lines.

SPINNAKER

Double rip-stop polyester fabric. Extra light (48g/m²). Special PU-coated for a perfect balance of tear strength and dimension stability.

PROTECTION

Heavy duty , super light kevlar patches in the tip range to prevent abrasion on the typical spots. Dacron panels for force distribution of the connection points.

KITE-BODY SEAMS

Glued and triple zick-zack , flat seam for less turbulences on the wing surface.

FLYING LINES

Pre-stretched and thermo-fixed and coated dynema lines from eurocord

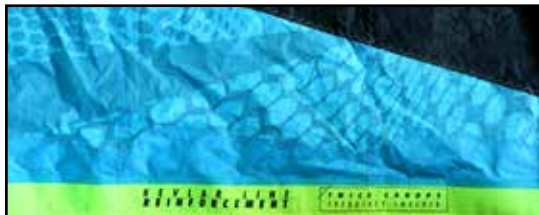

RESCUE HANDLES

Self rescue handles in the tips.

TE CONSTRUCTION

TE is reinforced with a kevlar(TM) line. Kevlar does not shrink and not stretch. Like this the dimension of the TE will stay the same for ever.

Stiff line gives a crisp bar feeling due to no stretch in the TE. Special shaped double spinnaker panels. The shape brakes down high frequencies and prevents fluttering, as well after many hours of use.

SPEED PUMP

Speed pump with double cross section connectors for easy inflation and deflation.

BRIDLES

Dynema lines with a polyester sleeve for protection, Logic V-bridles with triangle construction for stiff arc support.

BLADDER

100 micron polyurethan film. Special surface to prevent the bladder stick together.

IQ

COLOR: C2

COLOR: C3

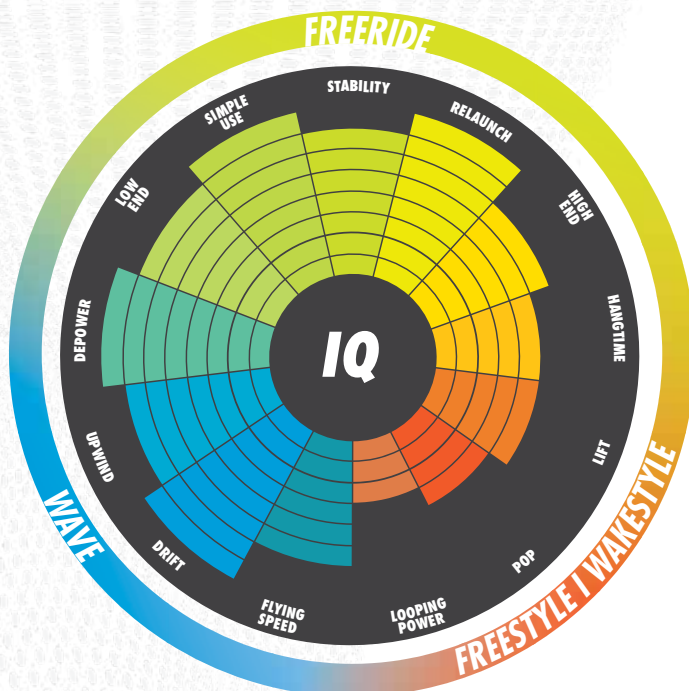

IQ

THE IQ IS THE KITE OF CHOICE FOR WAVE LOVERS LOOKING FOR A FAST MANOEUVRABLE KITE AND FREERIDERS LOOKING FOR STRAIGHT LINE PERFORMANCE THAT'S ALSO AGILE IN THE CORNERS.

Our all new IQ is designed to offer easy freeride and wave performance. A three strut construction offers stability and control, perfect for wave and freeride. A more bent leading edge profile results in the easiest relaunch in the GA range keeping you out of tricky situations in the white water. The new shape also improves the progressive power of the kite, resulting in great bar feeling, responsiveness even when depowered and stable performance in the waves. It's easier than ever to put this kite where you want it and ride where you want to ride.

If you are looking for a fun easy going kiting experience in the waves and on flat water the IQ is your choice!

- | PRECISE BAR FEEDBACK
- | PERFECT DRIFT AND STABILITY
- | INCREDIBLY EASY RELAUNCH
- | THREE STRUT CONSTRUCTION FOR OPTIMUM WEIGHT AND MANOEUVRABILITY

COLOR: C3

SPARK

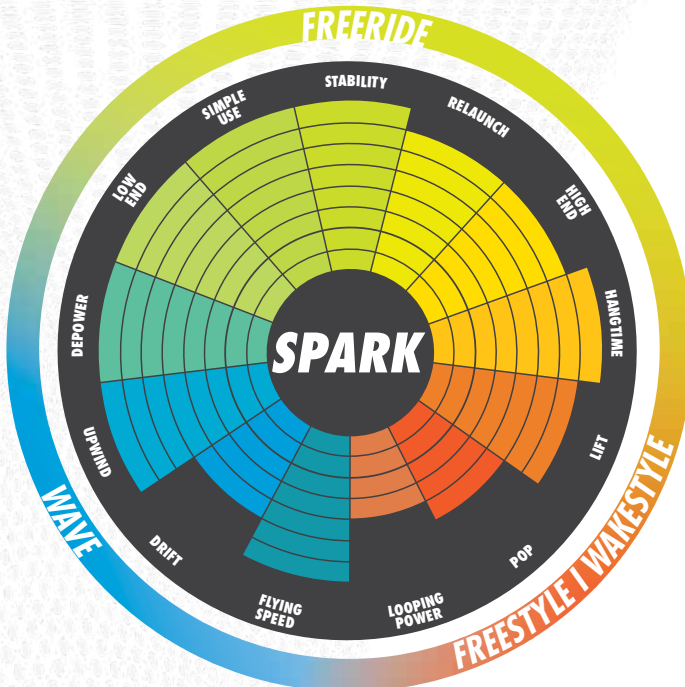

THE EASIEST WAY TO GO BIG! THE SPARK IS PACKED WITH PERFORMANCE TO MAKE THE MOST OF EVERY SESSION.

The Spark is designed to be the perfect freeride kite which lets you go for bigger airs than ever before. The 2018 Spark will let you focus on your kiting, not your equipment.

A refined profile improves response and opens the wind range even further. You have more power in low wind and more control than ever before when conditions get tough. The three strut construction offers a stable and easy to control kiting experience. With power and control at your fingertips flying high as simple as it can be and incredibly easy relauch makes the kite the perfect choice for riders looking to progress their kiting. Don't spend your sessions fighting your kite from the water.

The Spark is a best seller loved by beginners and pros alike. Many of our top riders choose the Spark when conditions are less than ideal and they need a kite they can rely on.

- | HIGH BOOST POTENTIAL
- | PRECISE BAR FEEDBACK
- | FLAT PROFILE FOR MAXIMUM UPWIND PERFORMANCE
- | 3 STRUT CONSTRUCTION OPTIMISES LIGHT WIND PERFORMANCE
- | HIGH TECH LIGHTWEIGHT CONSTRUCTION FOR MINIMUM WEIGHT AND MAXIMUM DURABILITY

COLOR: C1

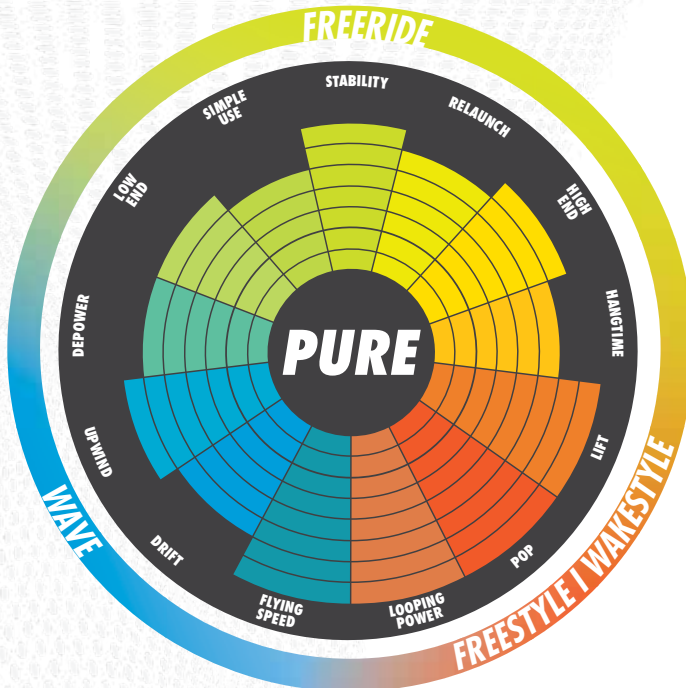

PURE

PURE CONTROL, PURE PERFORMANCE.

A PERFECT CHOICE FOR PROGRESSIVE FREERIDERS, AS WELL AS WAVE AND FREESTYLE ENTHUSIASTS EVERYWHERE.

The Pure is designed as a perfect cross over kite. It's ideally suited to the diverse conditions most kites enjoy in their season. When the waves aren't on the Pure's responsive profile makes freeride fun and precision steering and quick recovery make freestyle a breeze. From the cross-on waves of the North Sea to the radical walls of One-Eye, the Pure has been tuned to offer the perfect combination of stability, manoeuvrability and drift. The Pure is ideal choice for kite surfers looking to progress their kiting on both flat water and in the waves.

- | BALANCED PERFORMANCE ACROSS ALL DISCIPLINES
- | EXPANDED C-SHAPE FOR EXACT BAR RESPONSE AND FREESTYLE CONTROL
- | FAST TURNING, OPTIMISED WAVE RIDING
- | EXPLOSIVE AND PREDICTABLE POP
- | 3 STRUT CONSTRUCTION OPTIMISES FOR LIGHTER FASTER HANDLING

PACT

COLOR: C2

COLOR: C5

PACT

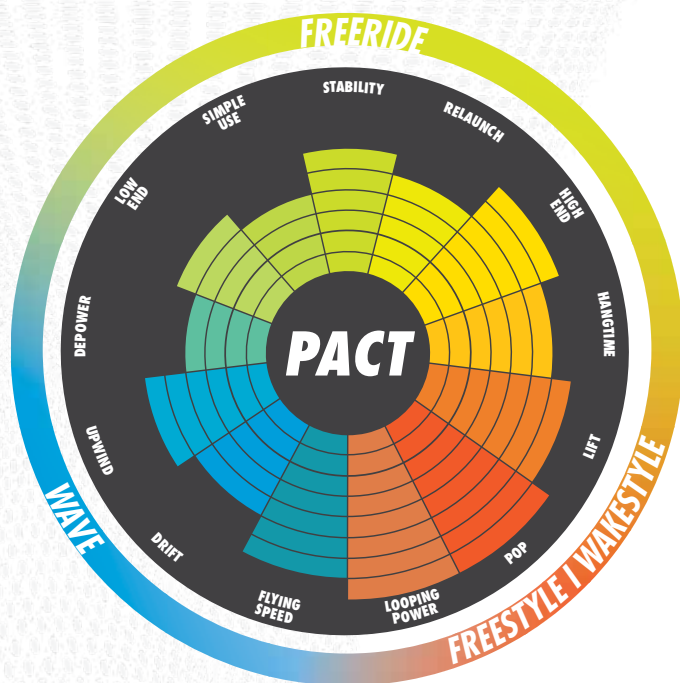

THE FREEDOM TO TEST YOUR OWN LIMITS.

The Pact is purely designed to further push the limits of the sport! Three times European Champion Mario Rodwald has focused on a refined pop, slack and precise bar feedback.

This real C-Kite is equipped with five struts and fifth line to hold the aggressive profile in shape. With great stability radical kiteloops can be landed safely as this kite returns to the edges of the wind window faster than ever. The Pact is a kite you can trust to take your riding to the limit.

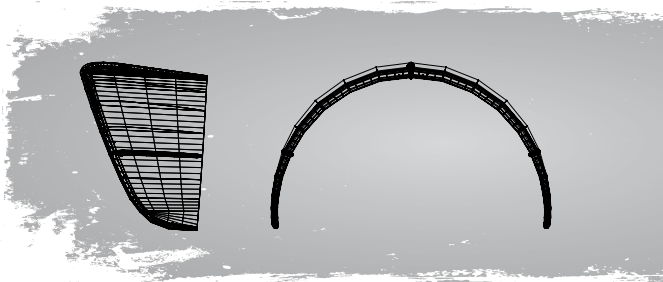

Additionally we developed the X4 - 5th line Wakestyle Bar. It provides a major control boost and uncompromising feedback for your unhooked moves. The freestyle setup enhances the big air abilities and delivers further depower.

- | INCREDIBLE POP
- | THE ULTIMATE UNHOOKED PERFORMANCE
- | FULL C-SHAPE FOR UNBEATABLE STABILITY
- | 5 LINE DESIGN FOR MAXIMUM STABILITY
- | KITE OF CHOICE FOR 3 TIMES EUROPEAN CHAMPION MARIO RODWALD

BARSYSTEM X4

RIDER MARIO RODWALD

GA
KITES
**NEXT LEVEL
PERFORMANCE**

B A R S Y S T E M | **X₄**

BARSYSTEM X4

The new Barsystem X4 is our lightest bar ever! Tons of features offer you maximum performance and safety. With just 23mm diameter it is one of the thinnest bar on the market, providing maximum feedback and grip. The Barsystem X4 fits to all GA Kites.

The biggest safety feature is the all new QR, fulfilling french safety regulations! Pull the QR in any situation to fully flag out the kite. The shift adjuster offers a very precise powering and also provides the comfort to set the distance of the adjuster according to the length of your arms.

Use the 21m for most direct and fastest kite setup or 24m for more power and high jumps. One bar does it all. The Barsystem X4 offers maximum comfort on one handed tricks by using a new metal center and a thin depower line. This bar sets a new standard in performance, design, comfort and safety.

FACTS

- Super thin bar for direct feedback
- Newly designed safer Quick Release with swivel
- Quick adjustment of the bar width 44,5cm - 53cm
- 21 or 24m lines by 3m extensions

BARSYSTEM X4-5TH

The X4-5th line is the perfect convertible bar for those that are interested in flying with a 5-line Y or low V 4-lines setup. The 5th line bar improves the depower response time of the kite to let the kite flag out completely on the nose line and makes it easier to relaunch the kite afterwards.

Our X4-5th line also dramatically reduces the range of movement required to power and depower. The compact bar length of 37-44,5cm gives you more range for performance freestyle tricks.

FACTS

- Refined 5th line setup
- Convertible to 4-line with low V
- Oversized chicken loop makes unhooking a breeze
- Responsive Depower
- Small steering range for maximum bar control
- Ultra-Comfort bar diameter and grip.

RIDER MARIO RODWALD

K I T E S

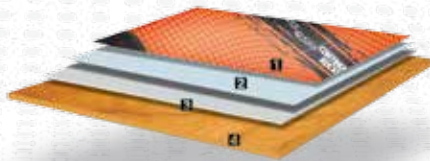

BLEND

BLEND

The Blend is the ultimate weapon for light winds. No matter if you want to be first when a light sea breeze kicks in or you want to blast through some moves on the lake this board provides super early planing. The wide tips, flat rocker and straight outline provide maximum upwind abilities. The handling is easy and also suits beginners on their first time on the board. This is the perfect board to keep in your truck, it guarantees a good session in any and all conditions.

- | BEST UPWIND ABILITY
- | EARLIEST GLIDING FOR LOW WIND
- | EASY HANDLING

- 1 Nonskid, Artwork, Paint
- 2 Biaxial Fiberglass
- 3 Uni Directional
- 4 Woodcore

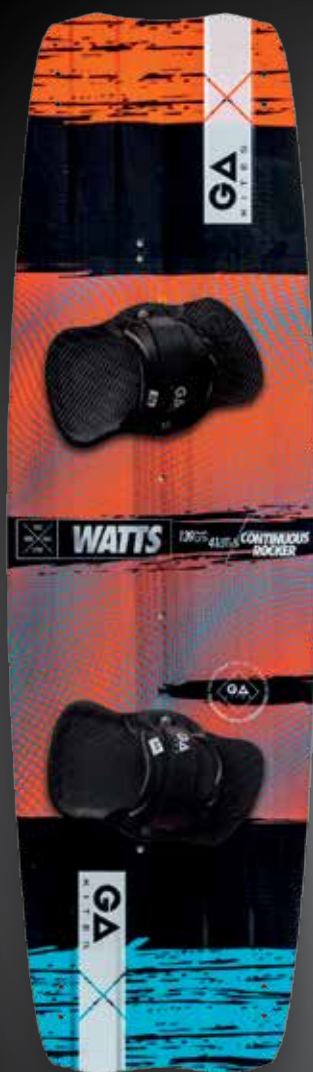

RIDER RANJA SCHLOTTE

GA
K I T E S

WATTS

WATTS

The Watts is defined by its double concave channel and wood core construction which make it the perfect crossover between freestyle and freeride. It not only has a huge range of use but can handle a massive wind range. The wider tips and the double concave deliver incredible upwind abilities and early planing at the same time.

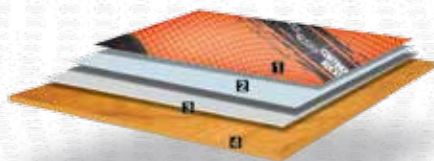

The controlled pop is perfect for huge boosts but also suits unhooked tricks. If you look for big controlled curves with some extra spray this is your board. A smooth but direct board with a huge range of use.

/ MAXIMUM CONTROL

/ WOOD CORE FIBERGLASS CONSTRUCTION

/ DOUBLE CONCAVE-CHANNEL CONSTRUCTION FOR PERFECT HANDLING

PACT

RIDER MARIO RODWALD

PACT

The Pact is our high performance freestyle board. Developed by three times European Champion Mario Rodwald it constitutes a premium construction that doesn't cut back on anything. The wood core and carbon stringers minimise weight and deliver huge pop and direct feedback. Mario added an extra stringer throughout the whole top to prevent negative flex when riding in boots. Choose the right stance from 73, 77 or 81 cm. The continuous rocker and the fiberglass construction absorb even the heaviest landings. Furthermore, the channel and concave construction allows you to ride smaller fins and provide maximum control on landings. This same rocker and outline also make the Pact the ideal choice for high wind or rough water freeride cutting through chop and keeping you in total control of your board.

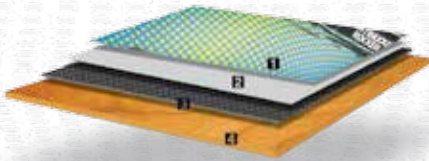

/ EXPLOSIVE POP

/ MAXIMUM CONTROL ON LANDINGS

MAX

RIDER MARCEL GLASER

MAX

A PERFORMANCE ALLROUNDER FOR THE EVERYDAY RIDER LOOKING FOR SURFBOARD WITH PERFORMANCE TO PROGRESS.

The 90Seven Max looks to blend easy access with pure wave performance. The perfect choice for free riders looking for a surfboard style shape or wave riders to take their performance to the next level. A fast rockerline and forgiving volume distribution help get you planing early and keep you comfortable on your board no matter what the conditions are. More width throughout the outline of the 90Seven Max will get you planing longer. Perfect for the days when the wind is not its best or the waves are fatter and slower.

Whether it's the real-world waves of the North Sea or a trip to the beaches of Cape Town the Max will maximise your water time no matter what conditions are on offer.

- / EASY TO USE, EASY TO CONTROL

SOLAR

SOLAR

THE EASIEST WAY TO ADD AN INJECTION OF FUN INTO LESS THAN PERFECT KITING CONDITIONS.

The 90Seven Solar is constructed get you a perfect feeling when handling the first tacks and jibes as well as in light winds and as a bump and jump machine. Designed to work well in clean or blown out surf this innovative board has a single into double concave planing surface with an ever so slight V tapered off in the tail section. While this design will work very well in the waves, its reduced rocker and longer flat section make it the perfect board for flat waters as well. You will never lose control again and get upwind effortlessly!

In order to give each rider the ultimate selection for set up the five Future fin boxes allow you to choose if you want to ride this board as a quad or thruster.

HARNESSES

RIDER MARCEL GLASER

HARNESSES

- 2018 -

VOLT PRO

- | 80 PIECES OF HIGH END MATERIALS MAKE THE CONSTRUCTION BOMB-PROOF!
- | THE DOUBLE 3D SHAPING GIVES MAXIMUM SUPPORT AND INTEGRATES LUMBAR COMFORT
- | THE NEXT GENERATION OF THE "SPRING LOADED BOLT" OFFERS MAXIMUM COMFORT ON AND OFF. BEST ERGONOMIC AND FUNCTION EVER!
- | THE INTEGRATED LEACH QUICK RELEASE OFFERS MORE SAFETY AND KEEPS YOU OUT OF POTENTIAL TROUBLE
- | NO PRESSURE OR STRESS POINTS, EVERYTHING IS PADDED WITH SOFT NEOPRENE

Shock therapy for the body, the VOLT PRO is our top of the line waist harness, brought to you in Double 3D! A revolution in itself, the cut combines ultimate support and all the freedom you need to move wherever the wind takes you. The beauty of this harness is how it forms around the body and ergonomically adapts to your back. An integrated EVA cushion gives maximum comfort.

The integrated double strap construction allows the rider to easily adjust the harness for a supportive and comfortable ride. The BUSB offers maximum comfort on and off the water. The VOLT PRO comes with the LQR function, a quick release for the leash to disconnect your kite from the harness in case of emergency for maximum safety!

AMP

- | NO PRESSURE OR STRESS POINTS, EVERYTHING IS PADDED WITH SOFT NEOPRENE
- | THE NEXT GENERATION OF THE "SPRING LOADED BOLT" OFFERS MAXIMUM COMFORT ON AND OFF. BEST ERGONOMIC AND FUNCTION EVER!
- | A SPECIAL MATERIAL MIX WITH FOCUS ON BEST STRENGTH TO WEIGHT RATIO RESULTS IN AN EXTRAORDINARY LIGHT WEIGHT HARNESS TECHNOLOGY

Our lightweight and simple harness offers you comfort, flexibility and maximum durability. From freestyle to huge rotations in big winds, the AMP can handle anything you throw at it. The EVA back pad gives protection and support to the rider. It has a built in suicide leash and keeps you ready for any action. The BUSB spreader bar has an integrated knife pocket and everything is padded with soft neoprene to eliminate any pressure points. When comfort is key, take a turn on the AMP.

PEAK

- | NO PRESSURE OR STRESS POINTS, EVERYTHING IS PADDED WITH SOFT NEOPRENE
- | THE DOUBLE 3D SHAPING GIVES MAXIMUM SUPPORT AND INTEGRATES LUMBAR COMFORT
- | THE NEXT GENERATION OF THE "SPRING LOADED BOLT" OFFERS MAXIMUM COMFORT ON AND OFF. BEST ERGONOMIC AND FUNCTION EVER!
- | LOW PROFILE CONSTRUCTION FOR STRONG SUPPORT AND FREE MOVEMENT

The all new PEAK has been developed by our team as a "little brother" to the ever popular VOLT. It has a narrower profile that allows more freedom of movement. The double 3D shape is there for ultimate support that will keep you going all day long. Lumbar support is key for long lasting sessions. The Peak delivers with the unique shaping characteristics that are built in to the harness. A single strap construction keeps things simple while maintaining easy and rigid adjustment. The BUSB provides comfort on and off the water. A padded spreader bar rounds out the package making this one of our favorite harnesses to date.

PEAK CONVERTIBLE

- | NEW CONVERTIBLE SYSTEM, SWITCH SEAMLESSLY BETWEEN SEAT AND WAIST HARNESS
- | ULTIMATE CONFORMED COMFORT, NO PRESSURE POINTS OR HARD EDGES.
- | INTEGRATED 3D DOUBLE SHAPE TECHNOLOGY FOR MAXIMUM LUBAR SUPPORT AND COMFORT
- | EASY TO USE SINGLE STRAP BAR SYSTEM
- | PADDED SPREADER BAR WITH INTEGRATED BUSB TECHNOLOGY AND "SPRING BOLT" SYSTEM

The PEAK has long been one of the most popular harnesses in our range. The narrow profile and ergonomic 3D design combine to provide the ultimate combination of support and freedom of movement. The PEAK CONVERTIBLE offers all the great comfort and freedom of our legendary PEAK waist harness with the bonus of being seat convertible. This allows you to enjoy the comfort, freedom and support of a waist harness with the control and performance of a seat harness when you need it. No more need for two harnesses. It's also a great option for those not quite comfortable or confident in a full racing seat harness. If you want a harness with the freedom to throw your next big trick and the support to send you rocketing past your friends on the race course look no further than the ultimate convertible experience.

FORCE

- | NO PRESSURE OR STRESS POINTS, EVERYTHING IS PADDED WITH SOFT NEOPRENE

Once you lock in to the comfort of our seat harness you will realize the benefits. Un-compromising style and comfort. The FORCE is equipped for all riders from the novice right up to the pro racer. A medium hook position combined with the multi strap system allows you to tune the harness to your liking. Extra leg straps and a safety belt make sure the hook does not slide around. Ample padding and a grab handle make this the most comfortable seat harness out there.
