THE STX PROMISE

ACCESSIBLE QUALITY

At STX we strive to make the sports we are passionate about accessible. Premium quality products are sourced from the world's leading suppliers, offering a simple, yet aesthetically pleasing range that caters to every level, including inflatable SUPs, packable windsurfing rigs, kids' and school rigs, composite and alloy paddles, windsurfing masts, windsurfing booms and other great accessories.

STX combines careful attention to detail and superior technology. Our dedication has ensured continued, steady growth on every continent.

STX, accessible for all.

STX offers a very
affordable collection
that promises
absolute quality

honey grip

Honey Grip EVA decks are used on all STX Inflatable SUPs, providing high traction and maximum comfort.

All **X-Light** boards are composed of a double-layer construction using Fusion technology, which increases board stiffness and decreases weight.

graphite composition

Carbon to fibreglass ratios in all our masts translate to factors like Reflex Speed, Durability, Stiffness and Weight. These factors produce varying results that cater to different riders' needs.

The extra strong **Helix Construction** of all our masts adds to their overall durability, preventing long term wear and scratches.

HELIX  construction

FREERIDE INFLATABLE SUP

Our **STX Freeride** board is designed for all-around cruising and smaller wave riding. Stable yet maneuverable, the **Freeride** has a wider outline and high volume nose. The Deck leash system adds additional versatility during paddling.

honey  grip

Honey Grip EVA decks are used on all **STX** Inflatable SUPs, providing high traction and comfort.

TOURER INFLATABLE SUP

The **STX Tourer** has been designed for all-around cruising and small wave conditions - stable, easy and maneuverable because of its outline. A high rigidity deck pad and Deck leash system adds versatility to your paddle session.

honey  grip

Honey Grip EVA decks are used on all **STX** Inflatable SUPs, providing high traction and comfort.

All **STX** SUP's feature **elastic bungee** to carry your personal belongings

183-244	29mm
202-262	29mm

RIGS 101

THE RIGHT RIG SETUP IS AN IMPORTANT STEP IF YOU WANT TO HARNESS THE WIND LIKE A PRO.

Your skill level, height and the conditions you want to use the sail in (mostly wind strength) are factors.

Beginners should go for a smaller sail, relative to their height (**ask instore**).

The sail weight is a vital factor. Beginners should go for sails with 4 or 5 battens because they're lighter. Heavier sails for more experienced riders.

As you get more experience you'll want to power up - more battens.

Check out our website for more info on choosing the right gear.

MINIKID

SIZES

1.0, 1.5, 2.0, 2.5, 3.0

CODE

407.70800.000

For the first steps in windsurfing or great family weekends.

Available in 4 nice color combinations. Light, easy to pack, easy to rig and made out of high quality monofilm with 2 glass battens.

A vario alloy mast and a easy to mount boom.

Uphail, ropeset and an adapter to fit on a 48mm base comes with the package.

The rig is packed in an easy to go bag which fits the complete rig.

POWERKID

SIZES

2.4, 2.8, 3.2, 3.6, 4.0, 4.4

CODE

407.70810.000

Rigs for the very young, the experienced but also the intermediate windsurfer. out of monofilm with reinforcement panels out of Dacron.

Featuring a 2-piece mast, an easy to mount vario boom and a sail with 3 full-length high modulus glass battens. Complete with ropes, uphaul and QR pin adapter for easy rigging.

Packaged in a size tailored rig bag for easy storage.

POWER HD MINI DACRON

SIZES

1.0, 1.5, 2.0

CODE

407.70820.000

These rigs are made to last. Made out of Dacron sail cloth material which is long lasting and durable in combination with a two piece alloy mast and a easymount boom. Every sail size has two battens and a fix color which is also very helpful in schools.

The whole rig, including adapter, ropeset and uphaul is packaged in a heavy duty tailored bag for easy travel and storage.

POWER HD DACRON

SIZES

2.4, 2.8, 3.2, 3.6, 4.0, 4.5, 5.0, 5.5, 6.0

CODE

407.70830.000

Full Dacron rigs with a vinyl window, made to last. The Dacron sail cloth material is long lasting and durable, combining a two piece epoxy mast and an easymount boom. All sail sizes have a fixed color, helpful in schools. Sails are made with three full length battens.

The whole rig includes adapter, ropeset and uphaul, packaged in a heavy duty tailored bag for easy travel and storage. **5.0, 5.5** and **6.0** feature a full size SDM epoxy mast and vario booms, built to withstand even the biggest surf.

SIZE COUNTS

CHOOSING THE RIGHT SAIL SIZE IS AN IMPORTANT CONSIDERATION.

A sail meant for easygoing planing in eight knot conditions on lake placid just won't cut it when sailing the ocean and larger breaks. rule of thumb: your sail should match where you'll be riding. Pay attention to the wind speed at your favorite spot and choose a sail that pairs those conditions with your body weight and skill level.

If that sounds confusing, ask instore, or get in touch with us for advice - **contact details at the end of this brochure.**

MASTS

A QUICK GUIDE

THE CORRECT MAST IS ALL TOO OFTEN OVERLOOKED WHEN CHOOSING GEAR.

At the outset, there are a few great features that all **STX** mast models share. An **XCORE Wrap** on the base of all our masts prevents long term wear and scratches. Another big plus is the **STX Boom Height** indicator.

As any pro worth their salt will attest, several core factors can affect a mast's overall performance. Even if it's paired with the best sail money can buy, this piece of gear should match your **specific riding style and expectations**.

Here's where science comes in. Through some sharp R&D at **STX**, we've refined the ratios of carbon to fibreglass in all our masts. In a nutshell, Carbon percentages translate to critical factors like **Reflex Speed, Durability, Stiffness** and **Weight**. These factors all pair off against each other to produce varying results that cater to different riders' needs.

Don't fret though - it's not as complicated as it sounds. Check out our simple comparative **diagrams and tables alongside** to see how **STX** models compare to each other.

At the end of the day, all **STX** masts perform brilliantly and look as good as they perform, so you can't really go wrong.
