Prolimit products are designed and developed in South Africa and the USA. Our products are tested worldwide and distributed on all continents.

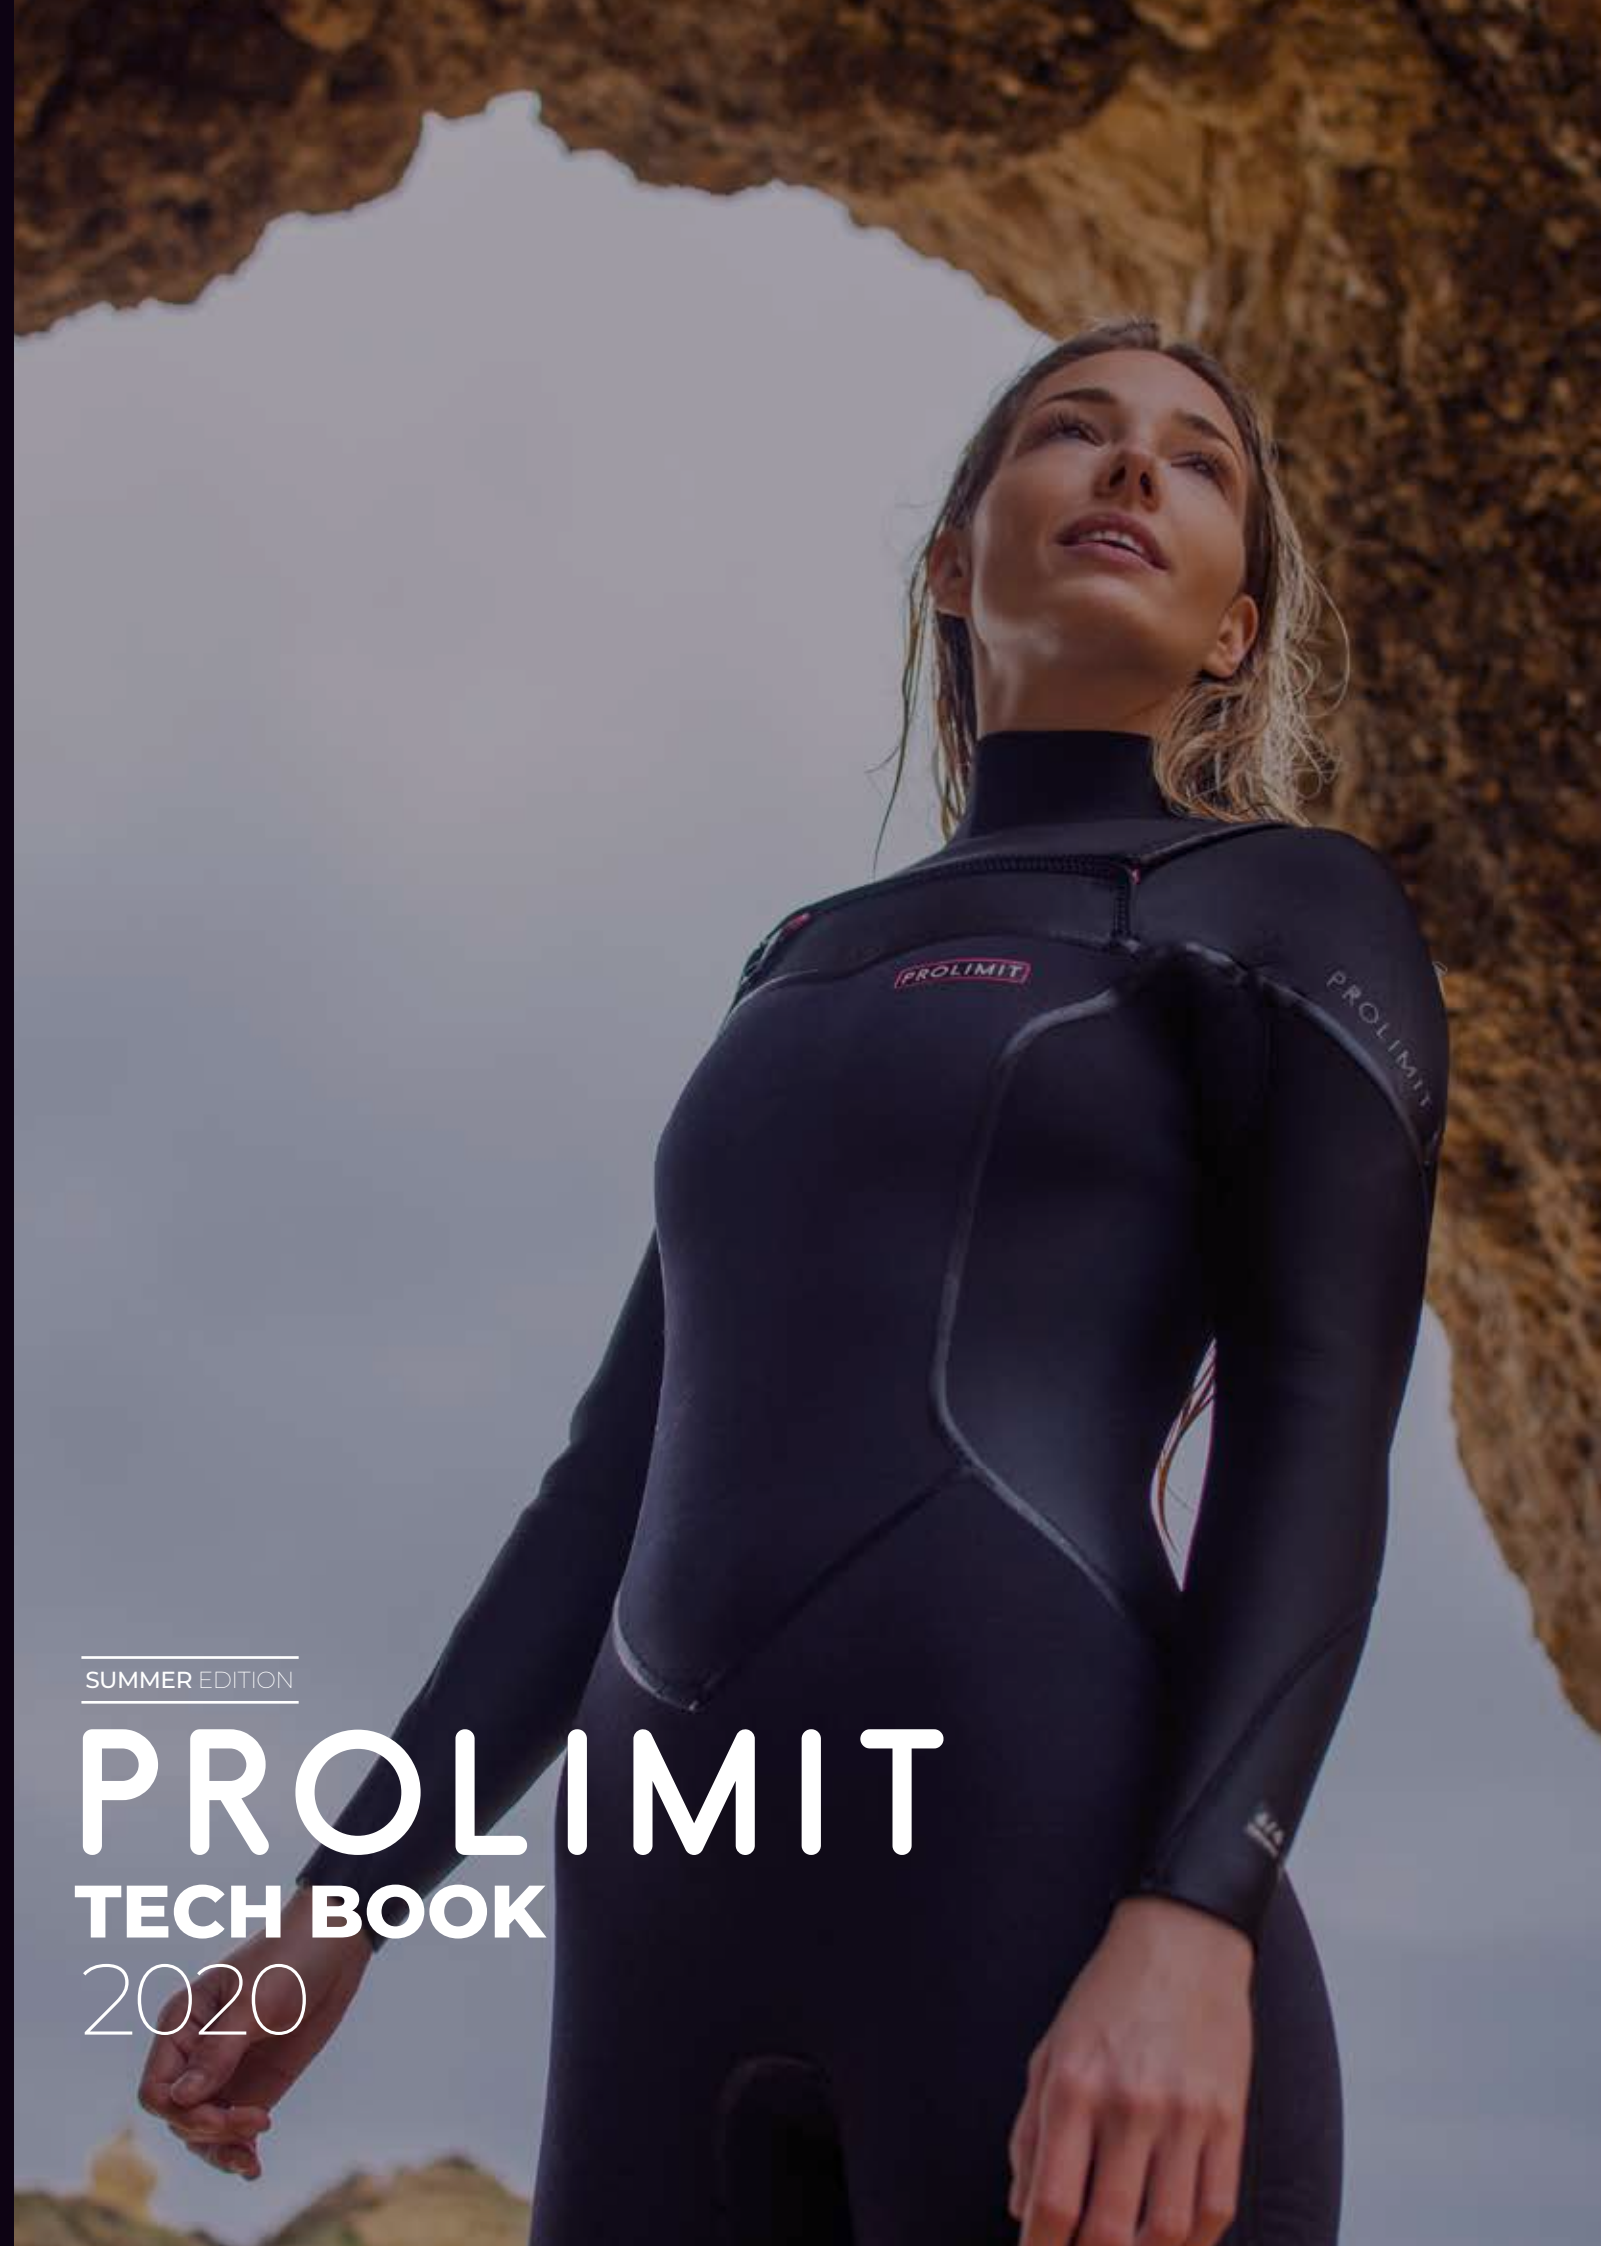

PROLIMIT TECH BOOK | SUMMER 2020

SUMMER EDITION

PROLIMIT

TECH BOOK

2020

Dear customer,

Prolimit is driven by a desire to create and build innovative watersport products. We lead the market with superior technology, applying industry-first innovations across a range of superior quality products. When it comes to developing reliable and good products that stand the test of time, our dedicated team of watermen have a proven track record - 36 years experience in our field - which ensures we do it right.

Prolimit was founded in the Netherlands, and we are now happy to be represented worldwide. Since it's inception, Prolimit has been instrumental in nurturing champions in the windsurfing and kiteboarding arenas. Many of the world's best athletes have found fertile ground with Prolimit, with our superior products allowing them to develop their talents . Our product engineering and marketing is driven from our head office in the Netherlands, working closely with our R&D and Design office in Cape Town, South Africa. Our extended team consists of a stable of talented designers, who physically test Prolimit products on the rugged, often challenging South African coastline. This, along with sub-zero conditions further north in the Netherlands, ensures more product testing time across all seasons. We also collaborate with experts from the USA and Taiwan on product technology. Our long lasting and strong relationships with the best factories in the world, ensures a superior quality product line that stands apart from the rest.

WETSUITS

WETSUIT TECHNOLOGY

NEOPRENE

4D NEOPRENE

4D NEOPRENE

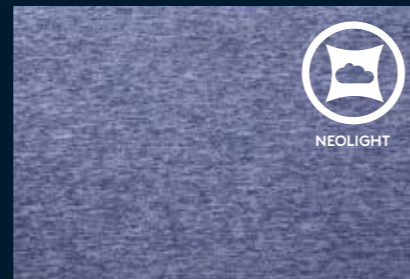

This material offers enormous stretch possibilities, a high wear outer surface and in combination with our aqua flow lining the softest material selection possible.

NATUREPRENE

NATUREPRENE®

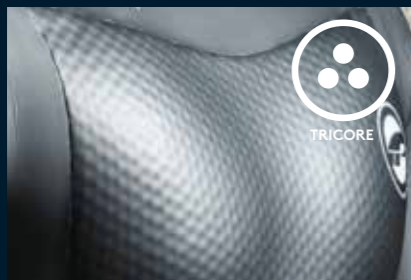

FSC is promoting environmentally appropriate products including cleaner air and water. Our Prolimit PF1 series is made out of plant based rubber derived from sources that are FSC certified. Our certified neoprene is laminated with recycled polyester and a lining made out of recycled PET bottles. Lamination is done with water based glue. 20% more stretch and lighter than previously offering full freedom of movement for most extreme conditions.

NEOLIGHT

NEOLIGHT DUOTONE 550+

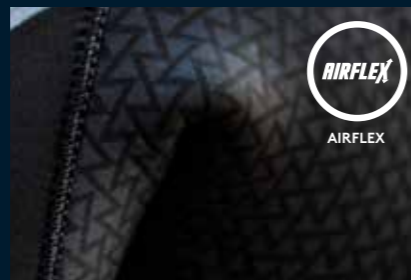

A Two tone fabric gives a different look to our product. Besides looks the extra yarns offer a softer, more stretch and a smooth feel to the outer lining. Always combined with the Airflex 500+ innerlining.

TRICORE

TRICORE

Tri core: 3layer Sandwich neoprene with air locked in the cells. More isolation, more flex.

AIRFLEX

AIRFLEX 550+ AND 300+ LIMESTONE NEOPRENE

We feature 3 types of Airflex neoprene. 300+, 500+ and 550+ stretch. Airflex neoprene is made out of limestone neoprene and by changing the formula of the foaming agents we can determine the stretch in our raw material. Laminating with the different backings is determining the final flex of the panels.

LIMESTONE NEOPRENE

LIMESTONE NEOPRENE

Our neoprene is made out of Eco friendly limestone neoprene. Limestone neoprene wetsuits are always more flexible, light, have exceptional thermal insulation with high stretch. This makes our wetsuits easy to take off, they have less drag and increased buoyancy for increased performance in above watersports. The maximum elongation of our high-grade neoprene is close to 500%, while human skin stretches to around 70%. This makes our wetsuits the most free moving wetsuits available.

AQUA QUICK DRY LINING

LIMESTONE NEOPRENE, REACH COMPLIANT

This means we have achieved to ban the use of extender oils in our neoprene sheets for a better environment. PAH neutral neoprene has improved characteristics such as weight, stretch and it prevents skin irritation that could be caused by extender oil residues or solvent containing glues and complies with the most strict rules for Restrict of Chemicals (Reach) as regards to polycyclic aromatic hydrocarbons.

CONSTRUCTION

POWERSEAM

POWERSEAM (PATENTED TECHNOLOGY)

A unique technology. Colored thin slick looking seams are triple glued and sealed off on one or both sides with a liquid rubber seal. The liquid seal reinforces the seams and prevent any water leakage. The advantage: Thin, colored, high wear resistant, watertight, super stretch seams and the ability to use it on skin surfaces.

FTM SEAM

FTM TAPED SEAMS

Our Fluid Taping Method seam construction. Triple glued seams with the outside of the seam sealed off by a wider black carbon neoprene seal. The inside of seam is protected by our glued and blind stitched technology. FTM TAPED SEAMS seams are durable, watertight and keep high stretch.

TAPERED NEOPRENE DRYSEALS

PROLIMIT NEO TAPE

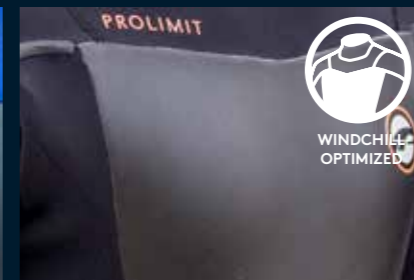

Prolimit Neo Tape is neatly laser cut and high frequency welded onto the inside of the wetsuit. Combined with Fluid taping method (FTM TAPED SEAMS) outside seams results in a neat, strong and durable seam. This tape creates a thin, stretchy, soft, clean and durable inside seam.

GBS SEAMS

GLUED AND BLINDSTITCHED SEAMS

Triple glued panels are stitched together with a special stitching method. Partially puncturing the neoprene to keep the water tightness of the wetsuit seam. Each thread is protected by a tape at the end. Our perfect finish makes our glued and blind stitched wetsuit indestructible. Precise seam and material placement for a tailored fit. Designed to fit your body without over-stretching the neoprene, which prevents stretched out thin neoprene and loss of thermal insulation.

WINDCHILL OPTIMIZED

WINDCHILL OPTIMIZED

Windchill optimized skin chest panel. Full skin mesh neoprene for extra warmth in wind chill areas. Perfect in colder climates for longer sessions

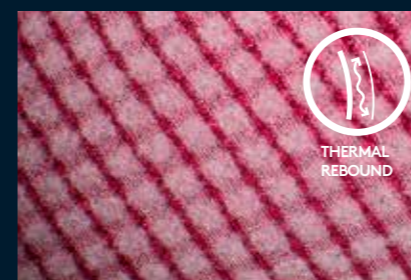

MESH NEOPRENE

MESH NEOPRENE

Full skin mesh neoprene for extra warmth in wind chill areas. Perfect in colder climates for longer sessions

INSIDE

THERMAL REBOUND

THERMAL REBOUND™

Thermal Rebound™ lining is directly derived from survival blankets for the protection against cold conditions. Extra protection layer between the neoprene and zodiac to reflect body heat and to block wind chill. Patent pending nr. 15/169,749

AQUA QUICK DRY LINING

AQUA FLOW LINING

Water and wetsuits are closely connected with each other. Water should go in a wetsuit and adapt to the human body temperature. Aqua flow lining channels the water away from the body, keeping the suit warmer, lighter and easier to dry.

ZODIAC LINING

ZODIAC LINING

Velvet feel on the inside, provided by high tech woven lining which absorbs the water from the skin and increases comfort.

INSIDE OUT

MERCURY TR

Thermal Rebound™ lining is directly derived from survival blankets for the protection against cold conditions. Extra protection layer between the neoprene and zodiac to reflect body heat and to block wind chill. Neoprene tape is neatly laser cut and high frequency welded onto the inside of the wetsuit. Combined with Flued taping method (FTM TAPED SEAMS) outside seams results in a neat, strong and durable seam. Neolight Duotone 550+ limestone neoprene panels with Thermal Rebound™ layout, Zodiac plush inside lining and FTM TAPED SEAMS seams.

- Prolimit Neo Tape inside seams
- Neolight Duotone 550+ limestone neoprene
- Zodiac plush inside lining plus Aqua flow Quick dry inside lining
- Thermal Rebound™ lining

VAPOR/OXYGEN

Thermal Rebound™ lining is directly derived from survival blankets for the protection against cold conditions. Extra protection layer between the neoprene and zodiac to reflect body heat and to block wind chill.

- Neolight Duotone 550+ limestone neoprene
- Zodiac plush inside lining plus Aqua flow Quick dry inside lining
- Thermal Rebound™ lining

Thermal Rebound; Patent pending nr. 15/169,749

MERCURY/HYDROGEN

Our Prolimit Two tone fabric with a softer feel and best stretch. Best LSS panel layout for better fit. Inside Zodiac Quick Dry lining with thermal properties keeping you warm in the key vital areas. Taking the most of your body, prevent any windchill. Aqua flow Quick dry inside lining, our channel system for faster drying. Makes your suit is faster dry for your next season.

- Neolight Duotone 550+ limestone neoprene
- Zodiac plush inside lining plus
- Aqua flow Quick dry inside lining

PREDATOR/FIRE-X

Airflex 500+ limestone neoprene with triple glued and blind-stitched seams and back zip with water block collar for easy entry. Zodiac Quick Dry lining with thermal properties keeping you warm in the key vital areas. Taking the most of your body, prevent any windchill. You find Zodiac panel on the chest and back and the Zodiac panel run till your knees.

- Airflex 500+ limestone neoprene
- Zodiac plush inside lining

FUSION/FIRE

Zodiac Quick Dry lining with thermal properties keeping you warm in the key vital areas. Taking the most of your body, prevent any wind chill. You find Zodiac panel on the chest and back.

- Combination of Airflex 500+ and 350+ limestone neoprene
- Zodiac plush chest inside lining

NORDIC SUP DRYSUIT

BACK STRETCH PANEL

Our new SUP drysuits feature a lumbar stretch panel. This neoprene panel allows the suit to stretch in length to allow for bending while paddling. The material springs back keeping the crotch higher which gives more leg mobility.

In paddling or swimming, the stretch panel gives big advantages.

T-ZIP MASTERSEAL

A full seal waterproof zip with easier opening/closing slide.

NORDIC SUP DRUSUIT

Light weight and breathable waterproof suit, easy entry flexible dry zip. Ideal for the cold days on your SUP, without wearing a restricting wetsuit. Tailored fit, keeps you warm, freedom of movement. Our new SUP drysuits feature a lumbar stretch panel. This neoprene panel allows the suit to stretch in length to allow for bending while paddling. The material springs back keeping the crotch higher which gives more leg mobility. In paddling or swimming, the stretch panel gives big advantages.

NORDIC SUP DRYSUIT

- 4 layer, waterproof, breathable, supple and lightweight microfiber
- Dryseal neoprene wrist and leg cuffs
- Adjustable neoprene collar
- Taped inside waterproof seams
- Flexible YKK dryzipper
- Back stretch panel and neoprene panel
- Waterproof 10.000mm/H2O
- Breathability 5,00 g/m²/24hrs (microporous coating)

ARTICLE NR.	SIZES
400.90065.000	48/S, 50/M, 52/L, 54/XL, 56/XXL

NORDIC SUPSUIT STITCHLESS

4-LAYER

The 4-layer waterproof breathable fabric combines a hydrophobic outer for waterproofing and hydrophilic inner membrane for keeping moisture away from the body.

PROLIMIT STICHLESS

High frequency welded seams are used carefully combined with inner seam protection tapes to ensure water tightness. Made out of a 4 layer Breathable material which is light and comfortable. The welded seams are neatly laser cut and high frequency welded tape onto the inside of the Supsuit This tape creates a thin, stretchy, soft, clean and durable inside seam.

NORDIC SUPSUIT STITCHLESS

Light weight and breathable waterproof suit, easy entry flexible front dry zip. Ideal for the cold days on your SUP, without wearing a restricting wetsuit. Tailored fit, keeps you warm, freedom of movement. NEW: High frequency welded seams are used carefully combined with inner seam protection tapes to ensure water tightness. Made out of a 4 layer Breathable material which is light and comfortable.

- Skin neoprene in combination with Airflex 500+ limestone neoprene
- GBS seam construction
- Zodiac plush inside lining plus Aqua flow Quick dry inside lining
- Sharktooth semi dry zipper
- Water Block collar

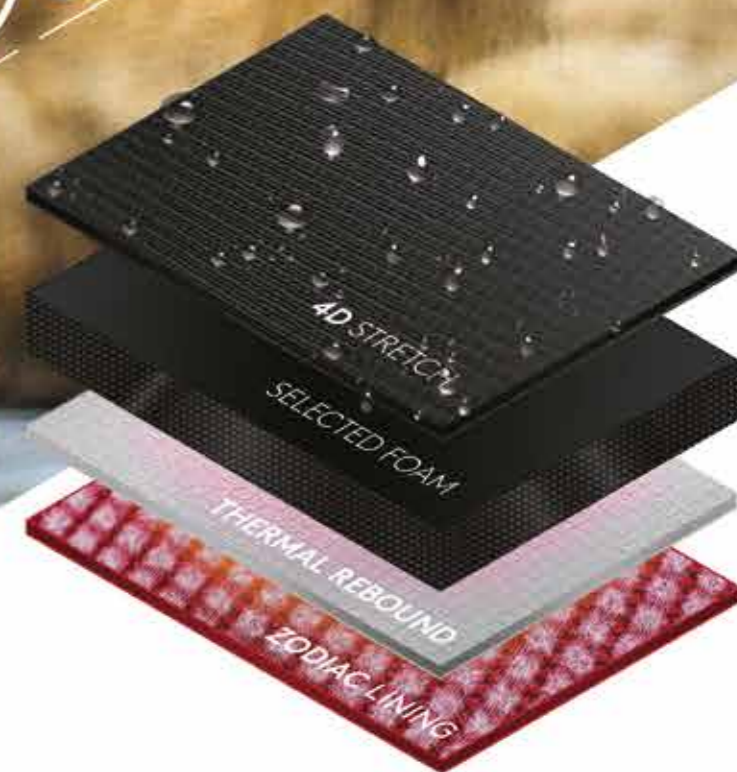

ARTICLE NR.	SIZES
400.90150.000	48/S, 50/M, 52/L, 53/LT, 54/XL, 56/XXL

HYDROGEN HYBRID

A hybrid freezip construction; skin neoprene in combination with Airflex 500+ limestone neoprene for the best wind-chill protection and optimized stretch.

THERMAL REBOUND ^{TR}

4D STRETCH

4 way directional stretch, offers enormous stretch possibilities. With the combination of aqua flow lining gives this material a softer feel.

SELECTED FOAM

Highest grade of neoprene foam is selected for the Mercury Range.

THERMAL REBOUND

Aluminium foil is laminated with Zodiac lining to give thermal core warmth.

ZODIAC LINING

Each part of the wetsuit is coated with a selection of thermal linings. The Vapor range has Zodiac lining.

VAPOR FREEZIP-X

THERMAL REBOUND™

Imagine...
NASA Technology in your wetsuit...
Creating a thermic barrier which rebounds your heat...
Comfort, dry and leightweight...

Thermal Rebound™ lining is directly derived from survival blankets for the protection against cold conditions. Extra protection layer between the neoprene and zodiac to reflect body heat and to block wind chill.

Patent pending nr. 15/169,749

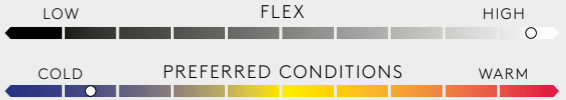

POWERSEAM

A unique technology. Colored thin slick looking seams are triple glued and sealed off on one or both sides with a liquid rubber seal. The liquid seal reinforces the seams and prevent any water leakage. The advantage: Thin, colored, high wear resistant, watertight, super stretch seams and the ability to use it on skin surfaces.

VAPOR FREEZIP-X 6/4 DL SINGLE POWERSEAM THERMAL REBOUND™

- Powerseam patented construction
- 4D limestone neoprene
- Zodiac plush inside lining plus Aqua flow Quick dry inside lining
- YKK Free-X asymmetrical front zip
- Thermal Rebound™ lining

ARTICLE NR.	SIZES
400.03040.000	48/S, 50/M, 51/MT, 52/L, 53/LT, 54/XL, 56/XXL

VAPOR FREEZIP-X 6/4 DL SINGLE POWERSEAM THERMAL REBOUND™

We gave our designers the total freedom. Make the best Prolimit suit ever with the best technical features. High-end materials, optimized panels and an asymmetrical front zip create ultimate freedom of movement for best performance. Thermal Rebound™ lining is directly derived from survival blankets for the protection against cold conditions.

Thermal Rebound, the warmest suit ever... period.
This technology goes back to the mid 1970's where NASA developed the thermal blankets for their manned missions into space as insulation. Since 2011 the same principle is used on all major sporting events where Athletes are draped in shiny silver blankets when they finish. Hypothermia is avoided and cramped muscles is reduced.
Prolimit combined NEOPRENE and laminated this on the inside with a Thermal alloy material with on top the comfortable Zodiac quick dry lining. Creating the warmest wetsuit on the market today!

NATUREPRENE

LOVE OUR PLANET, THINK GREEN ECO-FRIENDLY NEOPRENE.

First wetsuit in the industry with an FSC approval, most sustainable wetsuit ever made.

FSC (Forest Stewardship Council) is promoting environmentally appropriate products. Also including cleaner air and water. Our Prolimit PF1 series is made out of plant based rubber derived from sources that are FSC certified. Our certified neoprene is laminated with recycled polyester and a lining made out of recycled PET bottles. Lamination is done with water based glue. 20% more stretch and lighter than previously offering full freedom of movement for most extreme conditions.

NATURE AWARENESS

We make our products as eco-friendly as possible.

- Limestone neoprene. We use earth mined limestone to replace petrochemicals in our neoprene. It comes from Nature with less impact on our environment.
- Carbon Black. One of the key ingredients of neoprene. This is now pyrolyzed from scrap rubber tires. Cuts CO2 emission by 200 g per wetsuit.
- Neoprene Recycling. We recycle neoprene waste and turn them into qualified products.
- Dop Dyed Yarns. With this procedure in which we color the yarn without the dying process we save 104L of water per kg of fabric.
- PET Bottles in your wetsuit. 45 plastic bottles = 1 wetsuit. A wide selection of our our fabrics are knitted from polyester yarns made from recycled plastic bottles. We reduce waste and material consumption at the same time.

Every single wetsuit is carefully checked by quality control before being packed. For our 2019 wetsuit product range we minimize the use of plastic. Every single wetsuit will be packaged in a compostable bag and reduce of amount of plastics used.

WELL DONE ON CHOOSING THE MOST
ECO FRIENDLY PRODUCT PROLIMIT HAS EVER MADE.

This product is made from NATUREPRENE and follows 5 ECO FRIENDLY STEPS

NATURAL RUBBER FOAM: From renewable rubber tree farms FSC Certified FSC-C126859.

AQUA ALPHA GLUE: Solvent free and water based glue, eliminating harmful compounds.

DOPE DYED YARNS: Using less water and energy during the pigment stage

RECYCLED POLYESTER (PET LINING): Lining made from recycled bottles.

ECO CARBON BLACK: Recycled from used tyres, giving the rubber a true black.

THE FOAM IN THIS PRODUCT IS FSC APPROVED

PF1 FREEZIP

NATURE PRENE

Prolimit Ecological wetsuit, made with the best technology available.
Making eco-friendly wetsuits is a difficult, and expensive business.

We developed a renewable material that performed as good, or better, than traditional neoprene. A side effect is that less energy is needed as nature is helping us to produce this rubber instead of factories.
Less than 1% of the world's rubber supply currently comes from FSC certified sources.

- * Yulex plant based neoprene
- * Dip dyed yarns, saving water in the dyeing process by coloring the yarn
- * Outer lining made out 88% recycled Polyester of PET recycled bottles (45 bottles, 1 wetsuit)
- * Inner lining made out of recycled polyester
- * Inner plush lining is made out of recycled polyester and replaces zodiac lining
- * Laminated with non-solvent aqua based glue Aqua a
- * Glued with non-solvent water based glue
- * Removes 99% of the impurities and avoids latex allergies

Saves 2.698 CO2 Kg per wetsuit

Applied for FSC approval

GBS/FREEZIP

Triple glued panels are stitched together with a special stitching method, water based aqua alfa glue.
The Prolimit original freezip construction; we have created the best easiest access. Limited water entry and will keep you warm and comfortable during long sessions.

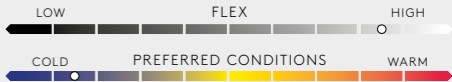

PF1 FREEZIP 6/4

Our ICON and a showcase. THINK GREEN! A low environmental impact high-performance wetsuit with respect for our planet. Nature Prene is flexible 100% eco friendly natural rubber harvested from rubber trees. Recycled polyester lining made out of PET plastic bottles is laminated with solvent free water based Aqua Alfa glue.

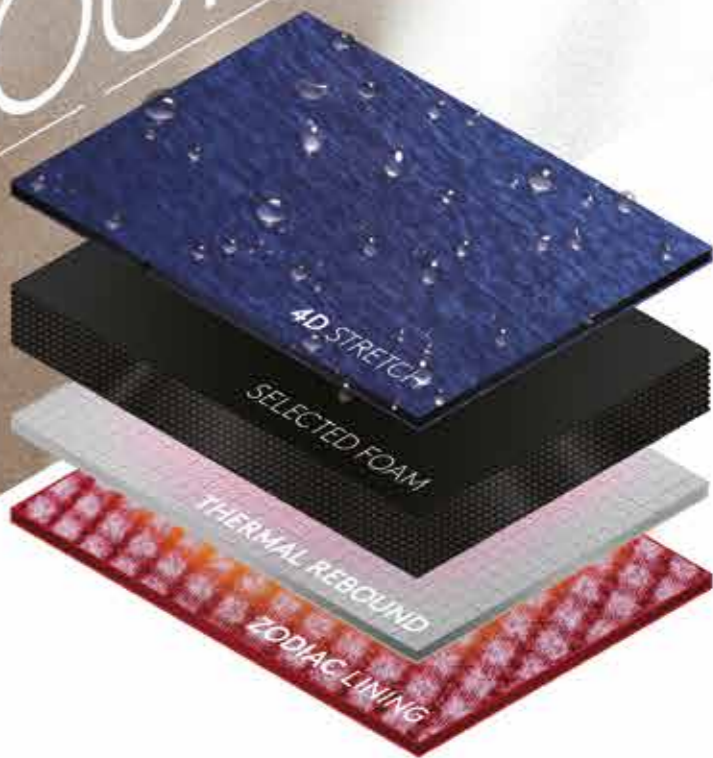

PF1 FREEZIP 6/4

- Low environmental impact high-performance wetsuit

Patent pending nr. 15/169,749

WATERBLOCK

The ultimate watertight mercury. To complete the Prolimit freezip construction we have created an additional water block seal to limit any water entry and to keep you warm and comfortable during long sessions.

PROLIMIT NEO TAPE

A unique neoprene tape, water resistant and rash reducing.
- NON STITCHED
- TRIPLE GLUED SEAMS, triple glued seams make water leakage non existent
- FTM SEAMS. Fluid rubber covering the seam for a strong barrier
- LASERCUT NEO HEAT HIGH FREQUENCY WELDED TAPE, stronger, more stretch and the third barrier against cold and water entering your wetsuit.
A stretchy laser cut 0.5mm thin neoprene tape is securely welded onto the seams. No excess glue on the tape edges which reduces also chaffing and irritation of the skin.

MERCURY FREEZIP THERMAL REBOUND™ 6/4

The strongest and ultimate watertight wetsuit. Neoprene tape is neatly laser cut and high frequency welded onto the inside of the wetsuit. Combined with Flued taping method (FTM TAPED SEAMS) outside seams results in a neat, strong and durable seam. Neolight Duotone 550+ limestone neoprene panels with Thermal Rebound™ layout, Zodiac plush inside lining and FTM TAPED SEAMS seams. To complete it a waterblock seal to limit water entry and to keep you warm and comfortable during long sessions.

THERMAL REBOUND™

Imagine...
NASA Technology in your wetsuit...
Creating a thermic barrier which rebounds your heat...
Comfort, dry and leightweight...

Thermal Rebound™ lining is directly derived from survival blankets for the protection against cold conditions. Extra protection layer between the neoprene and zodiac to reflect body heat and to block wind chill.

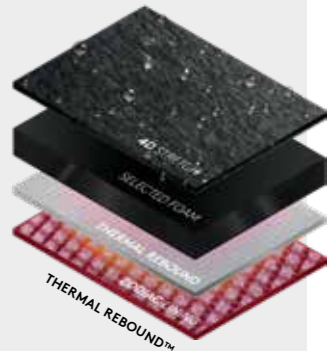

Patent pending nr. 15/169,749

FTM

Triple glued seams with the outside of the seam sealed of by a wider black fluid neoprene.

OXYGEN STEAMER 6/4 DL FTM THERMAL REBOUND™

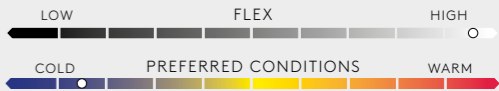

Our womens wetsuit with FTM TAPED SEAMS seams and Thermal rebound™ is our warmest and most high-end women's wetsuit. The stretchy minimized panel layout with Neolight duotone 550+, Thermal rebound™ Zodiac plush inside lining keeps you warm and comfortable during long sessions.

Thermal Rebound, the warmest suit ever... period.
This technology goes back to the mid 1970's where NASA developed the thermal blankets for their manned missions into space as insulation. Since 2011 the same principle is used on all major sporting events where Athletes are draped in shiny silver blankets when they finish. Hypothermia is avoided and cramped muscles is reduced.
Prolimit combined NEOPRENE and laminated this on the inside with a Thermal alloy material with on top the comfortable Zodiac quick dry lining. Creating the warmest wetsuit on the market today!

OXYGEN STEAMER 6/4 DL FTM THERMAL REBOUND™

A full-page photograph of two people paddleboarding on a calm bay. On the left, a man in a blue wetsuit is on a blue and white board. On the right, a woman in a white long-sleeved shirt and dark leggings is on an orange and white board. They are both using long paddles. The background shows a sandy beach, green dunes, and a clear blue sky. The word 'SUP' is written in large white letters in the bottom right corner.

SUP

NORDIC SUPSUIT STITCHLESS

4-LAYER

The 4-layer waterproof breathable fabric combines a hydrophobic outer for waterproofing and hydrophilic inner membrane for keeping moisture away from the body.

PROLIMIT STICHLESS

High frequency welded seams are used carefully combined with inner seam protection tapes to ensure water tightness. Made out of a 4 layer Breathable material which is light and comfortable. The welded seams are neatly laser cut and high frequency welded tape onto the inside of the Supsuit This tape creates a thin, stretchy, soft, clean and durable inside seam.

NORDIC SUPSUIT STITCHLESS

Light weight and breathable waterproof suit, easy entry flexible front dry zip. Ideal for the cold days on your SUP, without wearing a restricting wetsuit. Tailored fit, keeps you warm, freedom of movement. NEW: High frequency welded seams are used carefully combined with inner seam protection tapes to ensure water tightness. Made out of a 4 layer Breathable material which is light and comfortable.

NORDIC SUPSUIT STITCHLESS

- 4 layer, waterproof, breathable, supple and lightweight microfiber
- Dryseal neoprene wrist and leg cuffs
- Adjustable neoprene collar
- Taped inside waterproof seams

NORDIC SUP DRYSUIT

BACK STRETCH PANEL

Our new SUP drysuits feature a lumbar stretch panel. This neoprene panel allows the suit to stretch in length to allow for bending while paddling. The material springs back keeping the crotch higher which gives more leg mobility.

In paddling or swimming, the stretch panel gives big advantages.

T-ZIP MASTERSEAL

A full seal waterproof zip with easier opening/closing slide.

NORDIC SUP DRYSUIT

- 4 layer, waterproof, breathable, supple and lightweight microfiber
- Dryseal neoprene wrist and leg cuffs
- Adjustable neoprene collar
- Taped inside waterproof seams
- Flexible YKK dryzipper
- Back stretch panel and neoprene panel
- Waterproof 10.000mm/H2O

NORDIC SUP DRUSUIT

Light weight and breathable waterproof suit, easy entry flexible dry zip. Ideal for the cold days on your SUP, without wearing a restricting wetsuit. Tailored fit, keeps you warm, freedom of movement. Our new SUP drysuits feature a lumbar stretch panel. This neoprene panel allows the suit to stretch in length to allow for bending while paddling. The material springs back keeping the crotch higher which gives more leg mobility. In paddling or swimming, the stretch panel gives big advantages.

BOOTS & SHOES TECHNOLOGY

Our technicians:

SHAPE: By adding in more seam shape in the neoprene sock of boots & shoes this does not give a better fit.

REASON: The rubber of the sole and sides is cured in our oven on a high temperatures which moulds the boot into the same shape of the last

SOLUTION:

We developed our own OCL lasts.

All lasts on the market are not made for active water sports. They made for multi purpose usage; like for wader's boots or fishing purposes, which are static, shaped profiles.

We build the best last possible for active water sports. Together with an orthopedic specialist we analyzed different feet and came up with complete new last designs. In the design we incorporated the stretch of the materials, water influence and the dynamic positions of the feet during active water sport. Your feet are made of 26 bones and 214 ligaments; they need proper support, especially during active water sports.

OCL LASTS ARE DIFFERENT!

Most of the Prolimit boots and shoes are built using our unique, Prolimit owned, OCL (Orthopedic Controlled Last). No one in the entire industry made the same effort to go this far! We created the best SHAPE and TECHNOLOGY in a neoprene boot or shoe.

PROFILED HEEL

- Shaft is more raked back for the Dynamic position.
- The heel of our OCL lasts are much narrower closing nicely around your Achilles tendon and supporting it.

SWEPT FOOT PROFILE

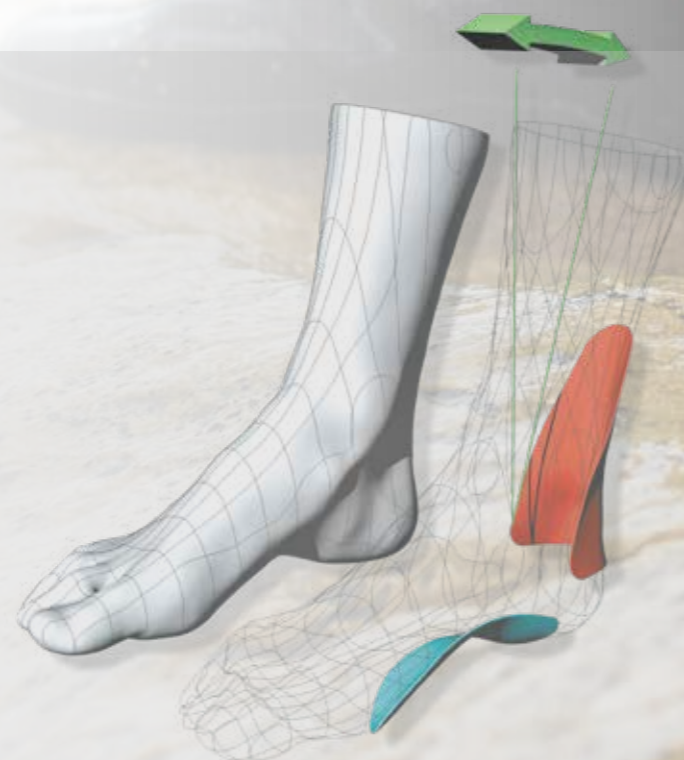

- Our arch is lower to prevent rolling of the boot around your foot.
- Our sole foot arch is pre shaped to fit the natural position of the foot which is not flat.

LESS WATER ENTRY DUE TO A SNUG AND EXACT FIT

OCL last build boots and shoes will have less water entry. You can hear the difference when filled up with water, while other boots suck in water. Neoprene is stretching in the water even more, all boots and shoes of other brands are sucking in water as boots and shoes are not fitting tightly enough around your feet. Prolimit OCL last build boots are making no noise at all. WHY? Simple, OCL last build boots are leaving no air space in the boot, which can't be filled with water. Shape and Technology, for better function and performance! Noticeable better products. We challenge you, do the test yourself.

WINDSURF HARNESSES

BARLOC™
PATENT PENDING

PURE™ Technology

- Thermoformed without any chemical resins
- 100% recyclable
- Cannot break, no splinters
- Lighter than water
- Extreme stiff, tough and strong, BALLASTIC proof!
- The principle of PURE™

PURE™ is a patented 100% polypropylene composite material, thus a mono material concept which is fully recyclable, resulting in a cleaner environment. PURE™ material has a high stiffness and low density (0.78 g/cm³; for comparison: GMT 30% glass is 1.1 g/cm³), and Pure is lighter than water! This combination of these two properties makes PURE™ ideal for the usage in harnesses.

The PURE™ tapes are co-extruded and consist of a highly oriented, high strength and high modulus core and a specially formulated skin on both sides for welding the tapes together in a compaction process using a hot-press or continuous belt press.

NEW ARGON

Maximum back support on a low profile. Extremely comfortable with a neoprene inside and molded EVA pillow. Made out of the patented PURE™ material. PURE™ is recyclable, environment friendly, buoyant (lighter than water) and cannot splinter as it is not fiberglass or resin based. The neoprene and molded EVA inside skin has maximum comfort. The internal neoprene belt ensures grip and justifiability to suit the riders needs.

ARGON - WINDSURF HARNESS

HARDBACK Low profile- waist harness.

- Internal neoprene high grip belt
- patented PURE material outside construction
- New spreaderbar "Fatbar" with multistrap connection
- High power optimized outline profile
- 4 buckle adjustable Patented pin-release PLT bar system
- Neoprene inside and molded EVA inside skin

TEAMWAVE MPL

This TEAM WAVE harness has improved even further. A complete neoprene inside, EVA molded pillow combined with a 4 point Mesh sticky belt for high mechanical grip. High density EVA outer layer, PU laminated for wrinkle free flex and elasticity. Pre-curved for correct fit. High back support and full length neoprene softedge to reduce chafe. Dual foam construction. Torque window side panels for torsional twist. Mark IV internal load plate construction for anatomical shape and comfort without riding up. Pin-release spreader bar with 4-way MPL webbing construction keeps the bar stable and quick to fit.

TEAMWAVE MPL - WINDSURF HARNESS

3D thermof foam molded high end windsurf waist harness.

- Neoprene inside
- Pre-curved and 3D shaped.
- 4 Point connected neoprene high grip belt
- Molded outside construction
- Wave optimized outline profile
- Patented pin-release PLT bar system
- Torque window for optimized load spreading
- Dual density support pillow
- Internal load plate Mark IV
- MPL belt construction

BOOMS

BOOM TECHNOLOGY

At Prolimit we take building booms seriously. Wave, Slalom, Freestyle, Freerace and Race sails all have different sail cambers and balance points along the boom. We have worked on using the right UIC boom bend curve for each size and discipline, allowing for overlap between disciplines either way.

Our smaller booms use a wave bend curve which favours an overhand grip for the front hand and suits the camber forwards design of sails in this range.

Our bigger booms favour a more camber rearwards bend curve. The race oriented models combine this bend curve with wider back-ends to suit even the most radical deep camber race sails.

MATERIAL ENGINEERING

Material use has been fine tuned to give the best combo of stiffness, durability, feedback and price. From aluminium tube, aluminium V-grip to carbon, these combinations result in the right boom for the right application.

FRONT END

Our much copied front end still sets a standard for solid stability and easy of use. The no flex design will still be solid years down the line.

PRO & PREDATOR

PRO BOOM

High performance boom: developed for maximum strength and functionality. Specific boom profile and monocoque construction.

- 29mm Diameter with 1.5mm wall thickness
- Made from T8 Easton Alloy, 2 piece construction
- Continious alloy front and back end to optimize stiffness.
- Double pin adjustment sytem for easy adjustment
- 60cm adjustment for maximum sail range coverage
- Axial boom head with intergrated skinny adapter

ARTICLE NR.	COLOR	SIZES
407.71210.010	Black/Grey/Orange	140-200, 160-220, 180-240, 200-260
407.71210.020	Grey/White/Orange	140-200, 160-220, 180-240, 200-260

PREDATOR

Our freeride boom with a wide profile forged backend. It has our specific boom Profile and monocoque construction. The predator is our freeride specific boom in black only.

- 29mm Diameter with 1.5mm wall thickness
- Made from T8 Easton Alloy, 2 piece construction
- Continious alloy front and back end to optimize stiffness.
- Double pin adjustment sytem for easy adjustment
- Wide light weight 60cm tailend with pulleys
- Axial boom head with intergrated skinny adapter

ARTICLE NR.	COLOR	SIZES
407.71225.000	Black/Grey	160-220, 180-240, 200-260

TEAM WAVE & TCS RDG

TEAM WAVE

Team wave has an narrow diameter in the grip area, 26mm. Our reduced diameter boom grip. Including our new RDM cup Axial boom head on the 145. On the 160 our axial boomhead with skinny adapter.

- Monocoque construction
- Narrow diameter in the grip area of 26mm (RDG)
- Manufactured from 1.8mm thick tube, for maximum stiffness
- Continuous front and back end.
- Double lever pin adjustment system
- 50cm adjustment for maximum sail coverage
- 2 piece construction
- Axial boom head with integrated skinny adapter (160)
- 145 RDM Axial Boomhead

ARTICLE NR.	COLOR	SIZES
407.71230.010	Black/Grey/Orange	145-195, 160-210
407.71230.020	Black/Blue/Yellow	145-195, 160-210

TCS RDG

They Call me Skinny. Our TCS is a full 26mm diameter boom wit a continuous alloy backend. It's a performance driven wave boom. Alloy continuous front and back end. 2 piece Axial boom. Including our new RDM cup Axial boom head on both sizes. This is the ideal wave boom.

- Specific boom profile constructed from continuous alloy tube
- 26mm diameter tube, T8 alloy, 1.8mm wall thickness
- Continuous aluminum front and back end.
- Double pin adjustment
- 60cm adjustment for maximum sail coverage
- Axial boom head with RDM
- **RDM Axial Front-end**

ARTICLE NR.	COLOR	SIZES
407.71260.010	Black/Grey/Orange	135-195, 150-210
407.71260.020	Black/Blue/Yellow	135-195, 150-210

PRO & PREDATOR

ASSAULT

Our V-grip boom. This extruded profile aluminium tube sets the standard for stiffness and comfort in smaller diameter booms. The tapered and ovalised inside section of the boom is more ergonomic than a circular section, reducing fatigue and arm pump. Featuring a 29mm Diameter with 1.5mm wall thickness made from T8 Easton Alloy. The Assault has 60cm adjustment for maximum sail range coverage. The Prolimit Assault boom means more power and less effort.

- Specific boom profile constructed from continuous alloy tube
- 29mm tubes, T8 alloy in 1.8mm wall thickness
- Carbon back-end for maximum stiffness
- Double pin adjustment
- 50cm adjustment for maximum sail coverage
- 2 piece construction
- Axial boom head with intergrated skinny adapter

ARTICLE NR.	COLOR	SIZES
407.71220.000	Black/Grey	140-200, 160-220, 180-240, 200-260

TEAM C100 CARBON

The Prolimit Team Carbon C100 boom is our full carbon monocoque boom. The C100 140 is a full RDG 24,5mm boom, other sizes are 26mm. Continuous carbon frontend and carbon backend gives you the stiffest boom construction available. This is the boom for thepro's, wave or slalom!

- Specific Boom Profile curve
- 24.5mm reduced diameter grip area for the 140
- 26mm reduced grip area for the other sizes
- Double pin adjustment
- Axial boom head with intergrated skinny adapter
- New c100 140 with wider back end

ARTICLE NR.	COLOR	SIZES
407.71250.000	Black/Grey	140-190 24,5mm, 180-240, 200-250
